Amphipolis mint. Head of Apollo right, wearing tainia / Horsema n riding right; ΛΥ above; below, forepart of lion right; [spearhead] in exergue. Thompson 3; Price 434. Good VF, slightly porous surfaces. Although these coins have traditionally been attributed to the beginning of Lysimachos' reign as king of Thrace, more recent sc holarship has persuasively placed them early in the period of his satrapy. Price, in his st udy of the coinage of Alexander the Great and Philip III, discounts the prior dating (circa 306/5 BC) and mint attribution (Lysimacheia), and argues for an issue placed at Amphip olis, circa 320-315 BC. During this time, Lysimachos was constantly waging war against the Thracian tribes and likely needed coinage for troop payments. The only source for hi m, at that time, would be his close friend Kassander, who controlled the mint at Amphip olis. This placement and dating conform well to the current scholarship regarding the mi nting of Philip II-type 1/5th tetradrachms. For further background, see, e.g., Price, pp. 1 30 and 197; **80**

Forepart of Pegasos right, displaying both wings / Incuse square with swastika-like pattern. CNG E-441, lot 34; Very rare. The Pegasos forepart is a very common type on silver fractions in the 5th century BC. However, the thin fabric of the flan, and this peculiar form of incuse is quite uncommon, and discounts a possible attribution to Lampsakos. The closest parallel is found among the mid-late 5th century tritartemoria of Eion in Macedon, which has a very similar flan and incuse, as well as a dotted border around the obverse type (cf. HGC 5, 525). The weight of this piece is consistent with the Attic-Euboic standard used at some cities in the region (including Eion), so it may originate from a city (or tribe?) that fell under Athenian control after the Persians were expelled from the region. **25**

Min. korrodiert, fast vorzüglich Aus einer niederrheinischen Privatsammlung. Erworbe n im März 2003. Das Münzbild rief unter der christlichen Bevölkerung von Antiochia gro ßen Aufruhr hervor. Die Antiochener deuteten den Stier als Opferstier - siehe Szidat, Zu r Wirkung und Aufnahme der Münzpropaganda (Iul. Misop. 355 d), in: Museum Helvetic um 38 (1981), S. 27. Da in Antiochia eine Hungersnot herrschte und den Christen der G enuß des Opferfleisches der in großer Zahl geopferten Stiere verboten war, ist ihre vom Kaiser in seiner Satire Misopogon (Barthasser) geschilderte spöttische Reaktion auf die Münze nicht völlig unverständlich. Da der Stier auch von Socrates Scholasticus als Opf erstier bezeichnet wird (hist. eccl. 3, 17) und die übrigen Deutungen des Stieres (Apissti er, Mithrasstier, goldenes Kalb, philosophisches Symbol für einen guten Kaiser und Zodi akalstier) aus vielerlei Gründen ausscheiden, handelt es sich bei dem auf dem Revers a bgebildeten Stier wahrscheinlich tatsächlich um einen Opferstier, siehe Thormann, Zur Deutung des Stieres auf den Folles Kaiser Julians, in: Bremer Beiträge zur Münz- und Geldgeschichte 4 (2005). Die jüngste Deutung des Stieres als Konzeptionszeichen (Kay Ehling in JNG 55/56, S. 111-132) steht im Widerspruch zur von Julian vertretenen Philo sophie des Iamblichos und der chaldäischen Orakel, siehe Thormann, Konzeptionszeic hen auf antiken Münzen? in: Lehmann (Hrsg.), Nub Nefer - Gutes Gold: Gedenkschrift f ür Manfred Gutgesell, Rahden 2014, S. 179-186. **350**
