- 530) Australia - South Australia Adelaide Pound 1852 Type I, Cracked Die Reverse, 9.64 grammes, KM#1 one of the classic World Gold rarities and Australia's first gold coin. VG/Fine Ex-Jewellery. Only around 40 examples are believed to have been minted of the type I piece. The Government Assay Office, Adelaide had only opened 9 months earlier, in February 1852, and had previously assayed gold nuggets into ingots from the South Australia goldfields. The intention was for these new coins to circulate in order to stimulate South Australia's then ailing economy. Now the minting of the coins, rather than ingots required further precision and care, and proved beyond the capabilities of the primitive minting processes then employed, and on the initial run the reverse die cracked and broke. The type II series followed in greater numbers from a new die. Examples of the type I series are therefore greatly prized as so few were minted. A rare chance to obtain such a classic World Gold rarity (£10,000 - £12,000)

**1362)** Five Guineas 1693 Elephant and Castle. S.3423. Obverse conjoined busts of joint monarchs right. GVLIELMVS ET MARIA DEI GRATIA. Reverse, crowned garnished square topped arms, lion of Nassau in centre Elephant and Castle below the bust S.3423. Edge year QVINTO in raised letters on edge, in an NGC holder and seems very conservatively graded at AU55, this Elephant and Castle variety, is usually more sought after. The famous Samuel King Five Guineas sale by Spink included their well researched analysis of Five Guineas offered for sale in a 40 year period and the 1693 E & C offered here had a frequency of 19 compared to 91 of the S3422 type (1693 without E & C below). William and Mary were spouses who reigned over the kingdoms of England, Scotland and Ireland. They began their joint reign in February 1689 after they were offered the throne by the Convention Parliament. James II (Mary's father) had fled the country and William and Mary occupied what was in effect a vacant throne. They were the first joint rulers in England for over 800 years, although Philip II and Mary I had appeared on English coinage together. Mary was to reign until her death from smallpox in December 1694 and William continued his rule alone, until his death in March 1702. (£65,000 - £80,000)

**1363)** Five Guineas 1693 S.3422 Obverse conjoined busts of joint monarchs right. GVLIELMVS ET MARIA DEI GRATIA. Reverse, crowned garnished square topped arms, lion of Nassau in centre. Edge year QVINTO in raised letters on edge, in a PCGS holder and graded MS62, with Prooflike and brilliant fields, a piece with remarkable eye appeal, the bust and reverse design lightly frosted, retaining much mint lustre, must surely be one of the finest known examples of this short series. At the time of writing, the PCGS Population report shows one example graded MS62+ and another at MS63 being the only finer examples. Across the entire William and Mary series combining all Five Guinea dates and varieties, only 4 examples have been graded higher by PCGS. and in August 2020 an example dated 1692 and graded MS63 by PCGS realised \$384,000 in Heritage, and is now being offered for private treaty sale at \$499,000, and we can tell you that that the difference in grade between MS62 and 63 is negligible. William and Mary were spouses who reigned over the kingdoms of England, Scotland and Ireland. They began their joint reign in February 1689 after they were offered the throne by the Convention Parliament. James II (Mary's father) had fled the country and William and Mary occupied what was in effect a vacant throne. They were the first joint rulers in England for over 800 years, although Philip II and Mary I had appeared on English coinage together. Mary was to reign until her death from smallpox in December 1694 and William continued his rule alone, until his death in March 1702. The reign of William and Mary was brief and their coins are relatively scarce. (£80,000 - £120,000)

**1368)** Five Pounds 1902 Matt Proof, a high relief example giving an almost three-dimensional effect, so much so that the coin rocks when placed on a flat surface. Apparently new dies were swiftly introduced to give a lower relief with consequent savings due to reduced striking pressure and less consequent die wear. nFDC the reverse with some hairlines below the horse's tail. An Extremely Rare and eye-catching piece. We note a similar example sold in London Coins Auction A151 6/12/2015 Lot 2416 for £6000 hammer price (£3,500 - £4,500)
