PRE-SALE & LIVE INTERNET BIDDING / TELEPHONE BIDDING

All online bidding can now be done on our website (www.sarc.auction). Our online bidding system is provided by iCollector.com. You can also place bids on their website and it will sync with any bids you place on our website. If you plan to only bid live during the auction, please be sure to register a few days in advance of the auction in the event that you have difficulties with the registration process. This will also allow us time to process your registration.

Visit the link below to register, and visit the same link to bid before the sale and live online on the days of the auction.

WWW.SARC.AUCTION

There is no additional fee to bid online.

Telephone Bids (by prior arrangement only). Please only register for lots on which you are planning to bid aggressively.

You must contact us by Monday, May 10th, 2021 at 17:00 PDT (California time) to register for telephone bidding.

We must arrange available operators for the telephones, so compliance with the registration deadline is appreciated.

PROXY BIDDING METHODS

We strongly encourage you to bid via our website or iCollector (www.sarc.auction), as that is our primary bidding system. If you are unable to do so or if you would like to place bids that are not executed until the sale begins (proxy bids) you may send bids to us using one of the methods listed below.

IMPORTANT NOTE: If you send bids to us by one of the methods listed below they will be treated as proxy floor bids. If another person places a pre-sale internet bid on our website, that internet bid will be treated as the first received, regardless of the time of receipt. We encourage you to bid on iCollector so that you do not lose a tied bid to a bidder who is using the primary bidding system (our website).

Please note that off-increment bids will be rounded down to the nearest bidding increment.

* Email your bids to: bidding@stevealbum.com

* Fax your bids to: 1-707-540-6001 (please email or call after sending to confirm receipt)

Rare date for the Umayyad mint in Spain.

200. **UMAYYAD: Hisham**, 724-743, AR dirham (2.90g), al-Bab, AH120, A-137, Klat-147, superb example, EF-AU \$160 - 200

al-Bab is now the city of Derbent in the Republic of Dagestan in the Russian Federation.

201. **UMAYYAD: Marwan II**, 744-750, AR dirham (2.93g), Balkh, AH128, A-142, Klat-186, lovely bold strike, VF-EF \$150 - 200

202. **UMAYYAD: Marwan II**, 744-750, AE fals (1.80g), Tiflis, ND, A-142T, Bennett-55, Zeno-45485, with the standard kalima divided between the obverse & reverse centers, the mint formula on the obverse, citing Marwan b. Muhammad in the reverse margin as *al-amir*, thus likely as governor of the Caucasus before achieving the caliphate in AH127, Fine, **RRR** \$400 - 500

Bennet & Zeno both report only two known examples, and this is presumably the third; described in detail by Turkia and Paghava in ONS Journal #191.

203. **UMAYYAD: AE fals** (2.77g), al-Anbâr, ND, A-N196, citing the governor tentatively read as Musa, together with his subordinate governor Ahmad (legend *mimma amara bihi amir musa(?) 'ala yaday ahmad*), with the obverse field bearing the phrase *amara Allah bi'l-wafa wa'l-'adl*, late Umayyad or early Abbasid by style, VF, **RRRR** \$220 - 280

Newly discovered type for this exceedingly rare mint. An earlier style of the same mint exists, with only two examples known, both sold in our Auction 31, Lots 278 & 279. By style and source I now believe that it was the eastern mint, not Iraqi, as previously suggested. Anbâr was located in eastern Khorasan, near Shafurqan in modern Afghanistan, and not to be confused with the Anbâr in Iraq.

204. **UMAYYAD: AE fals** (1.86g), Arminiya, ND (ca. 720s-730s), A-196, rare variety, as Walker-746 but without the words *wa jâz* after the mint name in the reverse margin, F-VF, **RR** \$100 - 150

205. **UMAYYAD: AE fals** (1.22g), al-Daybul, AH117, A-199D, citing the kalima divided as usual on Umayyad copper coins, with the reverse marginal legend *bism Allah duriba hadha al-fals bi 'l-dâybûl sanat sab 'ashara wa mi'a*, no marginal legend on the obverse, some porosity and erosion from having been in the salty soil in Sind, mostly on the obverse, expertly cleaned by the consignor, Fine, **RRRR** \$400 - 600

This is the 4th reported example of this mint. The city of al-Daybul was abandoned by the 13th century, and was located at a site known as Bhambore. The ruins of the original mosque, built by order of the governor of Sind, Muhammad b. Qasim, contained an inscription dated the equivalent of 727 (AH108/109), some 16 years after the Arab conquest of the town. The copper Fals dated AH117 is a new discovery. Copper coins are much less preserved than other metals and particularly so in the moist and salty environment of Daybul port city. This specimen is a testament to Arab rule over the area until the date of issuance of this coin.

206. **UMAYYAD: AE fals** (2.29g), Herat, AH120, A-H201, citing the governor Nasr, presumably Nasr b. Sayyâr, cited on fulus of Balkh dated 122, clear mint & date, pleasing Fine, **RRR** \$180 - 240

207. **UMAYYAD:** AE fals (1.31g), al-Mansura, AH122, A-A204, kalima divided between obverse & reverse, with the mint & date in the reverse margin, anonymous, decent Very Good, **RRR** \$140 - 180

208. **UMAYYAD:** AE fals (1.15g), al-Mansura, AH123, A-A204, first known dirham of al-Mansura dated 123 (boldly clear date); the style is identical to examples dated 122, as in our Auction 32, Lot 249, usually porosity, Fine, **RRR** \$200 - 260

209. **UMAYYAD:** AE fals (2.97g), al-Mansura, AH130, A-A204, first half of the full kalima // rest of kalima in square, mint / date formula around, anonymous, some moderate corrosion spots and usual weakness, second known example of al-Mansura for this date., **RRR** \$150 - 250

The only other known example was sold in our Auction 34, Lot 300.

210. **UMAYYAD:** AE fals (1.13g), al-Mahfuza, ND, A-E204, same reverse die as Lot 258 in our Auction 37, but the obverse is mostly corroded away; the mint name is very clear, always undated (struck circa AH115-116), VG-F \$150 - 200

211. **UMAYYAD/ABBASID: Anonymous**, 7th/10th century, AV burial piece (0.67g), bust right, derived from Hunnic silver coins, such as Alchon/Nezak drachms of the 6th/7th century, wearing simple headdress, facing right, meaningless "legend" around, bracteate, remarkably well-preserved, bold EF \$300 - 400

212. **UMAYYAD/ABBASID: Anonymous**, 7th/10th century, AV burial piece (0.75g), facing bust, derived from the Byzantine Emperor Justinian I (527-565), bracteate, original loop attached, attractive VF \$200 - 250

214. **UMAYYAD:** LOT of 8 common copper fulus in nice quality: Halab (2 pcs), Harran, al-Kufa AH100, Mawsil (in the name of al-Hurr b. Yusuf), al-Urdunn, and Wasit AH120 (2 pcs); all in VF or better condition; retail value \$520, **lot of 8 pieces** \$300 - 350

215. **UMAYYAD:** LOT of 8 post-reform silver dirhams from the reigns of each caliph (except Yazid III) & 6 miscellaneous common coins: al-Basra AH80, Wasit 95, Istakhr 97, al-Basra 100, Wasit 104 (mount removed), Wasit 126 (five annulets), Wasit 126 (seven annulets), and Wasit 130, all VF or better unless noted; plus Arab-Byzantine (Standing Caliph, Hims, VF); 1 common Umayyad and 1 common Abbasid fals; Ayyubid dirham; Almohad square dirham; and Ilkhan dirham (Hulagu, Mardin type); average grades; retail value \$500, **lot of 14 pieces** \$260 - 350

218. **ABBASID REVOLUTION: Anonymous**, AR dirham (2.82g), Tanbarak, AH133, A-207.2, Klat-198, Wurtzel-32, kalima in center, surrounded by mint & date formula within dotted circular double-border; in outer margin, the Kharijite motto *la hukm illa lillah* ("Judgment belongs to God alone") interspersed with four pellet-in-annulets // Umayyad reverse, with Qu'ran Sura 112 in field and 9:33 in margin, slight crimp near the edge, light hairlines, a coin of great historical significance and rarity, VF, **RRR** \$3,000 - 4,000

Album proposes the reading of Tanbarak for this mint, previously published as "Tanbuk" and "Baybird" (for Bayburt in Anatolia). It is probably one of the several Iranian fortresses known as Tabarak in later times, and perhaps for the same locale known in Parthian times as Tambrax, located in Mazandaran (Hyrcania in ancient Greek) and tentatively identified as the modern city of Sari.

The Kharijites (from Arabic al-khawârij</i>, "the Outsiders") were an early Islamic sect that emerged among the ranks of Ali b. Abi Talib after the Battle of Siffin in 658/AH36, in protest against the caliph's decision to arbitrate with Mu'awiya. They saw Ali's concession as a forfeiture of his moral authority and rebelled under the telling motto "Judgment belongs to God alone". Ali himself was killed by a Kharijite assassin in 661/AH40, and this movement would challenge Umayyad and Abbasid authority for the next several centuries, most prominently during the Abbasid Revolution and the Anarchy at Samarra. It was during the former period that this coin (as well as the previous lot in this sale, a dirham of al-Kufa AH128) was issued, though the specific circumstances surrounding it, including the name of the mint, remain unknown.

Struck from the same dies as Morton & Eden Auction 79, Lot 55 and Baldwin's of St. James's Auction 4, Lot 187.

The only other possible date would be 153, but the middle digit cannot be "50"; some adhesions on the reverse, unpublished, VF, **RRR** \$120 - 160

294. **ABBASID: lead seal** (9.47g), A-338Y, inscribed *ma'arra / al-awal*, referring to the city of Ma'arra (probably Ma'arrat Masrin, well-known Umayyad copper mint), date around, probably AH183 (partly obscured by adhesions), following the word *kharaj* before the date; *al-awal* refers to the first portion of the year's tax payment, VF-EF, **RR** \$110 - 150

301. **TAIFAS ALMORAVIDES: Anonymous**, 1146-1155, AV dinar (3.92g), NM, AH544, A-405, VyE-2001/02, Kassis-138, with *al-amr kulluhu lillah / la quwwa illa billah* instead of a ruler's name, below the kalima on obverse, EF, **RRR** \$1,200 - 1,600

This somewhat coarsely engraved type was probably issued somewhere in southeastern Spain by local contenders opposed to the rising Kings of Murcia and the Almohades arriving from North Africa. (see also lots 302 and 303 below).

There are numerous spelling errors through this coin, especially in the Qur'anic verse in the obverse margin. The overall calligraphic style resembles some of the dinars minted in the early to mid-540s in and around the Spanish city of Jaén. This date was unknown to Vives y Escudero, and noted by Kassis as a single known specimen in the British Museum, plus a second example sold in our Auction 14, Lot 227.

302. **TAIFAS ALMORAVIDES: Anonymous**, 1146-1155, AV dinar (3.78g), NM, AH544, A-405, VyE-2000 (same date), with *al-amr kulluhu lillah / wahduhu* instead of a ruler's name, below the kalima on obverse, with Qur'an verse 3:85 as on the Almoravid prototypes (the specimen cited by Vives y Escudero has a different Qur'an verse), lightly creased, EF, **RRR** \$800 - 1,000

The overall calligraphic style resembles some of the dinars minted in the early to mid-540s in and around the Spanish city of Jaén.

303. **TAIFAS ALMORAVIDES: Anonymous**, 1146-1155, AV dinar (4.10g), NM, AH558, A-405, VyE-2001/02, similar to Kassis-138, with *al-amr kulluhu lillah / la quwwa illa billah* instead of a ruler's name, below the kalima on obverse, but with many spelling errors, suggesting that this variant might have been issued by non-Muslim authorities, EF, **RRR** \$900 - 1,200

There are numerous spelling errors through this coin, throughout the text. The overall calligraphic style resembles some of the dinars minted in the early to mid-540s in and around the Spanish city of Jaén. This date was unknown to Vives y Escudero, and appears to be unpublished and probably unique (also unknown to Kassis).

'Ali**, 1142-1145, AV dinar (3.44g), Sijilmasa, AH534 (sic), A-471.1, H—, despite the date, this is surely another posthumous issue, presumably struck by order of straggling local authorities still loyal to the defeated Almoravids; creased, but decent quality, and appeared to be unpublished and probably unique, EF, **RRRR** \$800 - 1,000

The Western Liao, known as the Qara-Khitay ("black cathay") were originally nomadic tribes from northern China. They eventually fled through Mongolia, first to Xinjiang, later into areas of modern Kazakhstan and Kyrgyzstan, and established their capital at Balasaghun, located in the Chuy Valley east of Bishkek and slightly south of the Chu River, which divides the two modern countries. They are numismatically better known for their Chinese cash coins, either in normal or imitative Chinese characters. Examples of those extremely rare cash coins were sold in our Auction 23, Lots 691 & 692 (Zeno 63045 & 98637, respectively). The Islamic Qara Khitay coins are found almost exclusively at the medieval site at Krasnaya Rechka, located between Bishkek and Balasaghun. Interestingly, some of the Western Liao cash coins were also found at Krasnaya Rechka. Detailed analysis of the two basic Islamic types, one citing the caliph al-Mustashid (AH512-529), the other al-Muqtafi (AH530-555), was published by Michael Federov in the Numismatic Chronicle, volume 164 (2004), pp. 322-327, with illustrations of 12 pieces found at Krasnaya Rechka. The two pieces offered in this auction are the first examples cited on CoinArchives.

566. **SALDUQUIDS: Diya' al-Din Ghazi**, 1116-1132, AE fals (2.09g), NM, ND, A-A1890, obverse is derived from a Byzantine prototype, portraying the Virgin and Christ-child, citing the Seljuq overlord Mahmud II on the reverse, slight weakness as usual, strong Fine \$120 - 160

567. **SALDUQUIDS: 'Izz al-Din Salduq**, 1129-1168, AE fals (1.66g), NM, ND, A-1890A, 'izz al-din in central circle // cross pattée, with two pellets in each part of the cross, unusually nice example, VF, **RR** \$120 - 160

A.V. Akopyan has suggested that this type was minted at Dvin in Armenia, which was under Salduqid control circa 1153-1160. See Zeno-30762 for further information.

568. **SALDUQUIDS: Diya' al-Din Ayyub**, 1145-1148, AE fals (5.66g), NM, ND, A-C1890, St. George slaying the dragon, stylistically engraved, citing the Seljuq overlord Mahmud II in the reverse margin (only by his laqab *mughith al-din*), struck on remarkably broad flan, VF, **RR** \$120 - 160

569. **SALGHURID: Abish bint Sa'd**, 1265-1285, AE fals (2.36g), Shiraz, AH(6)66, A-1932, with Chinese character *bao* sideways in the obverse field, citing only the Qa'an as overlord, much rarer than the silver dirham with *bao*, VG, **RRR** \$100 - 150

570. **ATABEG OF YAZD: Yusufshah**, 1285-1297, AR dirham (5.86g) (Yazd), ND, A-1934, Zeno-209382 (same obverse die), with the Möngke tamgha in the center of the reverse (not included on the Zeno specimen), about 15% flat, About VF, **RRR** \$100 - 150

Mongol Dynasties

571. **GREAT MONGOLS: Chingiz Khan**, 1206-1227, AR dirham (3.14g), NM (Ghazna), ND, A-1967, inscribed *al-'adil / al-a'zam / chingiz khan*, thus citing Chingiz Khan by name, Zeno type A2/B2, bold VF-EF, **R** \$800 - 1,000

It has recently been suggested that this type was not necessarily struck at Ghazna, but by the Mongol military after it departed from Ghazna when chasing Mangubarni towards the Indus River, with minting equipment brought along from Ghazna.

572. **GREAT MONGOLS: Töregene**, 1241-1246, AR dirham (2.79g), Warawi, ND, A-1976, Vardanyan-23, horseman right, turned back and shooting arrow, Arabic legend *ulugh mughul ulush bik* above ("chief of the great Mongol nation"), with the city name instead of an animal below the horse, kalima on the reverse, undated, thick narrow flan, F-VF, **RRR** \$150 - 200

This is only mint and the only type of that mint (Warawi) to bear the city name below the horse rather than on the reverse.

573. **GREAT MONGOLS: Güyük**, 1246-1247, AR ½ dirham (1.06g), NM, ND, A-3754K (A-1976Fvar), Nyamaa p.51, perhaps struck in Khwarizm, Khooboo Ongi tamgha of Güyük Khan, with unread legend around // Arabic *la ilah illa Allah*, same design as the full dirham of Güyük, nice strike for this very rare type, VF, **RR** \$200 - 250

574. **GREAT MONGOLS: Güyük**, 1246-1249, AE jital (3.00g), Shafurqan, AH64(5), A-3755S, Zeno-193240, mint name in central square, date in numerals in the margin // kalima, VF, **RRR** \$110 - 150

575. **GREAT MONGOLS: Möngke**, 1251-1260, AV dinar (3.36g), [Marw], AH6xx, A-V1977, mint clear by style and design, overstruck on uncertain earlier type, Fine, **R** \$200 - 260

576. **GREAT MONGOLS: Möngke**, 1251-1260, AV dinar (5.05g) (Marw), ND, A-V1977, Zeno-164159 (same reverse die), legend *al-'adil / al-a'zam / mongu khan* within plain circle // *al-mulku lillah / wa muhammad r - / -asuluha salla / Allah 'alayhi*, all within dotted square, about 30% flat strike, appears to be the second reported specimen of this type, but with a totally different obverse die, crude VF, **RR** \$300 - 400

577. **GREAT MONGOLS: Anonymous**, ca. 1260s, AV dinar (3.75g), al-Imil, AH66x, A-C1967var, just *al-adil al-a'zam* within central circle, mint/date formula around, of which only 66x is clearly legible // kalima, legend around which is the mint formula, but uncertain, appears to be the second known example of this type and mint, VF, **RRR** \$500 - 700

The mint is partly off flan, but confirmed by Zeno-180655 as al-Imil, an unusual form of the mint with the initial article. Since it is dated in the 660s, it can equally be classified as Chaghataiyid.

578. **GREAT MONGOLS: Anonymous**, ca. 1220s-1240s, AV dinar (4.30g), Isfarayin, DM, A-1966, kalima reverse, mint name twice in obverse field, once in reverse field, probably circa 1230s or early 1240s, struck from well-executed dies, possibly dated in the reverse margin, but off flan as on both known examples, VF, **RRR** \$700 - 1,000

Same dies as the dinar sold in our Auction 39, Lot 573, where we listed the mint incorrectly as Astarabad, but is clear-as-day Isfarayin on this specimen and that one. These two are the only Great Mongol dinars known from the mint of Isfarayin.

579. **GREAT MONGOLS: Anonymous**, ca. 1220s to early 1230s, AV dinar (4.50g), Jand, AH[6]2x, A-A1967, in the name of the Abbasid caliph al-Nasir, likely after his death in AH622; mint cited above the obverse field, 'ashrin of the date clear in the obverse margin, very rare mint in Kazakhstan, possibly struck before the death of Chingiz Khan in AH1224, crude F-VF, **RRR** \$500 - 600

Two examples listed on Zeno (#15467 and 104436), none on CoinArchives, and none in our important Auction #10. Jand was one of the first towns conquered by Chingiz Khan during his first and incredibly successful invasion of the Khwarizmshah lands.

580. **GREAT MONGOLS: Anonymous**, ca. 1230s-1250s, AV dinar (2.54g), Samarqand, AH6xx, A-A1967, with the peculiar word that resembles 'adil below the name & title of the caliph al-Nasir, VF, **R** \$220 - 260

Islamic Coins

581. **GREAT MONGOLS: Anonymous**, ca. 1220s-1240s, AV dinar (2.63g), NM, ND, A-A1967, double struck obverse, about 15% flat, traces of a marginal legend on the reverse, but probably crudely engraved and illegible, VF \$200 - 260

582. **GREAT MONGOLS: Anonymous**, ca. 1220s-1240s, AV dinar (3.34g), NM, ND, A-C1967, unusual calligraphy, different from others we have handled, EF \$240 - 300

583. **GREAT MONGOLS: Anonymous**, ca. 1240s-1260s, AR dirham (2.26g), NM, ND, A-X1977, obverse legend *qa'an al-'alimayn al-'adil* ("khan of both worlds, the just"), kalima reverse, Khorasanian style, unpublished, VF, **RRR** \$140 - 190

584. **GREAT MONGOLS: Anonymous**, ca. 640s-650s AH, AR dirham (3.11g), NM, ND, A-1978K, obverse in Persian, *be-qovvat-e aferidegar-e 'alam*, 'by the power of the Creator of the world', and posthumously citing the caliph al-Mustansir (AH623-640) on the reverse, different calligraphic style, thus likely struck at a different mint than the usual examples, choice EF, **RR** \$140 - 180

585. **GREAT MONGOLS: LOT** of 12 iron arrowheads of various types, measuring from 145 mm to 67mm, plus 1 Central Asian copper spindle whorl (cf. Zeno-9781), average grades; retail value \$200, **lot of 13 pieces** \$80 - 120

586. **CHAGHATAYID KHANS: Chaghatay**, 1227-1241, AR dirham (2.29g), Almaligh, AH638/638, A-1979, *al-'adil / al-a'zam // 'al ghayat* ("very noble [alloy]"), some weakness, clear date on both sides, VF, **RR** \$150 - 200

587. **CHAGHATAYID KHANS: Qara Hulagu**, 1241-1247, AR dirham (1.88g), Almaligh, AH639/643, A-1980, *al-'adil / al-a'zam // 'al ghayat* ("very noble [alloy]"), obverse die dated 639 muled with reverse die dated 643, minor chipping and weak strike, VF, **RR** \$120 - 180

Almaligh was a medieval city located between Yining (Ili) and the Kazakhstan border in present-day Xinjiang, China.

588. **CHAGHATAYID KHANS: temp. Qaidu**, 1270-1302, AR 1/2 dirham (0.72g), Taraz, ND, A-1985D, Zeno-5282 (same dies), double "f" tamgha only // mint name only; nice even strike, VF, **RRR** \$120 - 160

589. **CHAGHATAYID KHANS: temp. Qaidu**, 1270-1302, AR 1/2 dang (dirham) (0.49g), NM, ND, A-1985D, Zeno-257310 (same dies), double "f" tamgha only // Arabic *nisf dang* ("half dang") in the center, blundered marginal legends both sides, VF, **RRR** \$120 - 160

Saray mint was the medieval town of Sali Saray in Turkmenistan near the Afghan border, as cited by P. Petrov for the Zeno coin; all known examples are from the same pair of dies, with the date in words in the lower right corner of the reverse field.

594. **CHAGHATAYID KHANS: Buyan Quli Khan**, 1348-1359, AR dinar (5.98g), Otrar, AH(752), A-2007P, as #2007 but with a 3-character Tibetan 'Phags-pa word added below the obverse field, average strike (about 15% flat), VF, **RR** \$200 - 260

For interpretation of the Tibetan word see Zeno-41968.

595. **CHAGHATAYID KHANS: Suyurghatmish**, 1370-1388, AR 1/6 dinar (0.98g), Badakhshan, AH778, A-E2012, plain circle // square in circle, clear mint & date, attractive VF, **RRR** \$180 - 240

596. **CHAGHATAYID KHANS: LOT of 46 kebeki dinars and 9 small denomination silver coins**; the kebeki dinars include Tarmashirin, Yesun Timur, Muhammad, Khalil Allah, Qazan Timur, Dashmand, and Buyan Quli Khan, average VG to Fine condition, but almost all with considerable weakness, a few with mint names (Bukhara, Tirmidh, and Otrar), almost none with legible date, probably all can be identified by comparison with examples posted on Zeno; the small coins are mostly earlier issues, similar grades, and one nice example of the Shah of Badakhshan ('Ali Shah II, choice VF); retail value \$1500; **lot of 55 pieces** \$700 - 900

597. **SHAHS OF BADAKHSHAN: Bahramshah**, 1360s-1374, AR 1/6 dinar (1.27g), Kishm, AH772, A-2017, with the title *sultan mu'azzam*, mint at the bottom of the obverse, date in numerals to the left, standard kalima filling the reverse, VF, **RRR** \$100 - 150

This and Lot #2354 2nd and 3rd confirmed Islamic coins form the mint of Kishm. The other piece was a gold dinar of the Khwarizmshah ruler 'Ala al-Din Muhammad, sold in our Auction 39, Lot 524.

Kishm is a city in the northeastern Afghan province of Badakhshan, not to be confused with Kish in Central Asia (now in Uzbekistan).

598. **SHAHS OF BADAKHSHAN: Muhammad Shah**, fl. 1380s, AR 1/6 dinar (1.07g), Badakhshan, ND/DM, A-2017M, the identity of Muhammad Shah remains unknown; the style, especially the kalima reverse, is identical to 1/6 dinar coins in the name of the Chaghatayid Suyurghatmish, which are known dated 781-786, VF, **RRR** \$140 - 180

This is the third known specimen of this mysterious ruler; the other examples are SICA-9:319 (same obverse die) and our Auction 39, Lot 630 (different dies), mint name atop the obverse.

599. **AMIR OF BALKH: Anonymous**, ca. 1275, AR dirham (2.22g), Balkh, AH673, A-2017S, Zeno-271364, with the phrase *al-mulku lillah* in the obverse field, the mint name in the reverse field, with a reverse to the Great Mongol emperor above, as *qa'an al-mu'azzam*, date in words around the reverse margin, lovely strike, believed to be the second known example, VF, **RRR** \$200 - 260

The phrase "al-mulku lillah" ("the kingdom belong to God") suggests that Balkh was controlled by neither the Chaghatayids, then ruled by Qaidu, nor the Ilkhan, then under Abaqa.

600. **GOLDEN HORDE: LOT of 6 silver dirhams**, including Toqtu Khan (Qrim 698 & 707), Uzbek Khan (Qrim 713), Jani Beg (Saray al-Jadida 743 & 752), and Sayyid Ahmad II (NM ND); average circulated grades or better, the first 5 with legible mint & date; retail value \$300, **lot of 6 pieces** \$125 - 175

602. **GOLDEN HORDE: Berke**, 1257-1267, AR yarmaq (1.87g), Qrim (Crimea), ND (1264-67), A-2019G, citing his title *nusrat al-dunya wa'l-din*, with mint & tamgha on reverse, VF, **RR** \$200 - 250

603. **GOLDEN HORDE: Mangu Timur**, 1267-1280, AR dirham (1.51g), NM, ND, A-2020var, Mangu Timur's tamgha in center, meaningless Arabic legend around // standard kalima, with a few spelling errors, almost certainly struck during the time of the Great Mongol emperor Kublai Khan (1260-1294), unpublished, VF, **RR** \$100 - 150

Northeastern style, likely struck somewhere in the region between northern Xinjiang and western Mongolia.

604. **SUFID: Husayn**, 1361-1372, AV fractional dinar (1.15g), Khwarizm, ND, A-2063, F/D—, *al-sultan al-adil* in square // mint name in square, probably an issue of Yusuf rather than the earlier Sufids, by style, but could be the last issue of Husayn, very rare subtype which is always undated, VF-EF, **RR** \$170 - 200

An Extremely Important Coin of Shahin Giray

607. **GIRAY KHANS: Shahin Giray**, 1777-1783, AR 40 para (piaster, ghrush, ½ rouble) (14.90g), Baghcha-Saray, AH1191 year 5, A-2112, Ret-162/164var, cf. Sariev-457/460, 3rd monetary series; standard obverse (similar to Sariev-329 of the 2nd series), toughra reverse with ornate flower left & right with fancy floral sprig below the toughra, oblique reeding, couple small scratches in upper left field on the obverse, superb strike, finest style, unknown to Sariev and apparently unpublished, lovely EF, **RRRR**, ex Dick Nauta Collection, from our price list #57, Lot 568 (1989) \$4,000 - 5,000

The obverse, with mint, date, and tamgha, is elegantly engraved, most notably with the "5" for regnal year slightly to the right of the first letter of "baghcha". The reverse is also superbly engraved, with two gorgeous floral objects slightly different from the selection found on the silver coins of both the second and third monetary series. This piece was likely produced from a pair of dies that failed, or was some sort of initial pattern, or struck from standard engraved dies that were only briefly used or forgotten. This is one of the most important coins of Shahin Giray that we have ever handled.

This rare coin is featured on the cover of the printed catalog for this auction!

From Wikipedia: "After the death of Islam Shah Suri, the Suri Empire was in a civil war where various contenders to the throne fought each other for supremacy. Sikandar Shah Suri was occupied with his struggle against Ibrahim Shah Suri when Humayun mobilized an army from Kabul. He captured Rohtas Fort and Lahore in February 1555. Another detachment of his forces captured Dipalpur and Jalandhar. Their advanced division proceeded towards Sirhind. Sikandar sent a force of 30,000 to intercept them, but they were defeated by the Mughal army in the Battle of Machhiwara, and Sirhind was occupied by the Mughals.

Sikandar led an army of 80,000 and met the Mughals at Sirhind. On June 22, 1555 they met in battle. Humayun and Bairam Khan carried out a daring raid in a rainstorm like Sher Shah Suri had done at the Battle of Chausa to defeat Humayun. Sikandar was defeated by the Mughal army and was compelled to retreat to the Sivalik Hills in northern Punjab. The victorious Mughals marched to Delhi and occupied it and reestablished their empire in India."

915. **MUGHAL: Jahangir**, 1605-1628, AR rupee (11.30g), Kashmir, AH102(9) year 15 (1620), KM-150.8, cf. Zeno-145322, zodiac type (Gemini), struck in the month of Khurdad (May 22-June 21); twins embracing, radiate sun in background // *jahan faroz gasht ba-kashmir sikkah-i-zar, za naam-i-jahangir shah shah akbar* (In Kashmir, the gold coin has become world-illuminating, by the light of the name of Shah Jahangir [the son of] Shah Akbar); edge repaired, PCGS graded VF Detail, **RRR** \$3,000 - 5,000

This is the second zodiac rupee from Kashmir ever to appear in a public auction (see Spink Auction 14038, Lot 692). It was acquired by the consignor in the late 1960's from the then-head of the Afghan customs. Whitehead (NC 1931, p.91-130) knew of only 3 zodiac rupees (all Gemini) from this extremely rare mint, struck during Jahangir's visit in 1620, as well as a single Cancer mohur dated AH1034/R.Y.20, bearing the name of his powerful Queen, Nur Jahan.

It is no secret that Jahangir was deeply in love with Kashmir, a place he adoringly called "a garden of eternal spring" in his memoir (Tuzuk-i-Jahangiri). In 1619, he would order the construction of Shalimar Bagh, his own garden of dreams, on the shore of Lake Dal in order to please Nur Jahan. It is quite likely that the emperor, known for his astrological acumen and artistic patronage, would use the zodiac rupee (a type he invented two years earlier) to commemorate this particularly meaningful visit.

His rule was at the time when Sikh Bhangi Sardars were a predominant force in Cis-Sutlej Punjab. The First Occupation of Multan led by Sardar Jhanda Singh Dhillon took place within his rule (from the Gazette of Dera Isma'il Khan).

Found in several locations in northern Xinjiang and Mongolia, this mysterious and rare coin has sparked debates over its origin and meaning ever since its initial discovery in 1979. The Chinese characters do not appear to refer to any ruler or location, leading some to call it a Buddhist charm (Rhodes & Hall in ONS-170). Others have attributed it to the Uyghur Khanate (744-840), both due to the find locations and the significance of the sun and the moon in the royal titles under the influence of Manichaeism. In 762, the Uyghur khan Böğü Qaghan (759-780, Mǒuyǔ Kèhán in Chinese) converted to this religion after encountering four priests in the Tang capital, Luoyang. He soon adopted it as the official religion of the khanate. Among its doctrines, its adherents worshipped the sun and the moon as important deities and prayed every day in their directions. The khan's conversion became memorialized on the Karabalgasun Inscriptions during the reign of Alp Bilge Qaghan (808-821, Bāoyì Kèhán), where he is posthumously given the title "kūn tāngriǎ qut bulmis" ("he who received blessings from the Sun God"), as opposed to his lifetime title "tāngriǎ qut bulmis" ("he who received blessings from Heaven"). Curiously, Alp Bilge Qaghan and his successors are all referred to as "kūn (sun)" or "ay (moon) tāngriǎ qut bulmis" in historical records. This led Lin (1998) to posit these later khans as the issuer(s) of Ri Yue Jin Guang. It is based on this argument that we tentatively assign this coin under the Uyghur Khanate. (See Kenzheakhmet 2007 for a possible decipherment of the reverse.)

This particular example was discovered in Mongolia. It is the second-ever example to appear in an auction (see our Auction 31, Lot 2772).

From 822, the You Zhou (within modern Hebei) area enjoyed virtual independence from the rest of the empire. In April 1854, the Prince Qing Hui, Ke Qin, along with others, memorialized requesting permission to levy copper for casting large coins and to establish a mint because of the dire state of payments to the army. They proposed to collect 200,000 or 300,000 jin of copper, from which it was calculated that 100,000 strings of coins could be cast. In May, the Prince reported that he had established three furnaces. In July, he requested permission to cast large coins Value Two Hundred, Three Hundred, and Four Hundred. On the 24th day of the same month, the casting of Value Two Hundred to One Thousand stopped. By August 1854, the Prince Qing Hui mint did not have sufficient copper to supplement the casting of regulation coins, and was ordered to close immediately. The surplus copper was transferred to the Board of Revenue, and the workforce was disbanded.

Charms

1116. **CHINA: Guang Xu**, 1875-1908, AE charm (6.04g), CCH-217, *ding cai gui shou* (offspring, wealth, prominence, longevity) on reverse, VF, ex Dr. Axel Wahlstedt Collection \$75 - 100

1117. **CHINA: AE charm** (21.75g), CCH-527, 43mm, dragon & phoenix with flower, a well-crafted charm possibly representing the Emperor and the Empress, rim nicks, VF \$75 - 100

This example was cast in the Qing Dynasty.

1118. **CHINA: AE charm** (5.75g), CCH-571, 25mm, *shui lu ping an* // trigram "kan" and Chinese blade weapon, F-VF, ex Dr. Axel Wahlstedt Collection \$100 - 150

The "Righteous Fists of Harmony" became the "Righteous Harmony Society" and adopted the slogan "support the Qing, destroy the Foreigners." The group believed that a mixture of the martial arts, spirit possession, and swords would make them invulnerable to guns. This ragtag army became known as the "Boxers" and the uprising is referred to as the Yihetuan or 'Boxer' Rebellion. The rebellion, however, was ultimately put down by the combined forces of eight foreign countries. This Chinese charm dates from this same time period and is believed by some to have been a secret "badge" carried by members of the Boxers.

1119. **CHINA: AE charm** (11.69g), CCH-727, 36mm, *fu shou shuang quan* (happiness and longevity both complete) // Star of Longevity (*shòu xian*) at right, auspicious symbols around, Fine \$75 - 100

Likely cast in the Qing dynasty.

1120. **CHINA: AE charm** (15.03g), CCH-823, 40mm, character *fu* at atop, deer and old man at sides, spider below // *wu zi deng ke fú shòu shuang quán* (May your five sons achieve great success in the imperial examinations - Happiness and longevity both complete), Fine \$75 - 100

Likely cast in the Qing dynasty.

1121. **CHINA: AE charm** (27.91g), CCH-824, 44mm, *yi pin dang chao zhuang yuan ji di* ([May you be] an official of the first degree at the imperial court and first rank at the examination for the Hanlin Academy) // *fú* (fortune) above, auspicious symbol below, VF \$75 - 100

Likely cast in the late Qing dynasty or early Min Guo period.

1122. **CHINA:** AE charm (13.18g), CCH-833, 46mm, Eight Treasure Charm, phoenix and deer facing each other, both representing long life, auspicious symbols around // *jīn yù mǎn táng cháng míng fù guì* (enjoy long life and prosperity), surrounding the outer rim are eight treasures starting at the one o'clock position and going clockwise are the pearl (flaming pearl), the silver ingot (sycee or yuan bao), the double lozenge, the coral, a single rhinoceros horn, the writing brush and Chinese ink, the precious mirror, and the scepter (*rúyǐ*), a well-cast example, VF \$60 - 90

This is an example of rebus, or the use of images for their phonetic value, a common practice in China. When combined, phoenix (fèng) and deer (lù) are homophonous with the word for an official's salary, thereby expressing a wish for a top government office with a high salary. Located at the bottom of the charm and near the tree is the lingzhi or "fungus of immortality". The deer is believed to be the only animal able to find this magical plant.

This example was likely cast in the late Qing Dynasty.

1123. **CHINA:** AE charm (30.25g), CCH-897, 51mm, *wu zi deng ke* (may your five sons achieve great success in the imperial examinations), ornate border // pine tree and deer, both symbols of longevity, Fine \$75 - 100

Likely cast in the Qing dynasty.

1124. **CHINA:** AE charm (30.25g), CCH-946, 52mm, *zhuang yuan ji di* ([may you be] the first rank at the examination for the Hanlin Academy) // dragon and phoenix, VF \$100 - 150

Likely cast in the late Qing dynasty or early Min Guo period.

1125. **CHINA:** AE charm (48.97g), CCH-1045, 62mm, *jīng xíng qīng yún* (auspicious star, blissful cloud) in ornate border // auspicious design, VF \$100 - 150

Likely cast in the late Qing dynasty in either Yunnan or Guizhou Provinces.

Photo size reduced.

1126. **CHINA:** AE charm (23.19g), CCH-1774, 44mm, twelve animals of the Chinese Zodiac, *zi chou yin mao chen si wu wei shen you xu hai* around // eight trigrams *qián kǎn gèn zhèn xùn lí kún duì* around, VF \$75 - 100

The Chinese zodiac is a classification scheme based on the lunar calendar that assigns an animal and its reputed attributes to each year in a repeating 12-year cycle. The 12-year cycle is an approximation to the 11.85-year orbital period of Jupiter. Originating from China, the zodiac and its variations remain popular in many East Asian and Southeast Asian countries, such as Japan, South Korea, Vietnam, Cambodia, and Thailand. Likely cast in the late Qing dynasty.

1127. **CHINA:** AE charm (20.58g), CCH-1776, 44mm, Lei Ling "Daoist curse charm", *lei zou sha gui jiang jing / zhan yao chu xie yong bao / shen qing feng / tai shang lao jun ji ji zhi ling* which translates as "God of Thunder (Lei) clear out and kill the ghosts and send down purity / Behead the demons / Expel the evil and keep us eternally safe / Let this command from Lao Zi be executed quickly" // eight trigrams with inscription *qián kǎn gèn zhèn xùn lí kún duì* around, VF \$75 - 100

The large characters at the extreme right and extreme left of the obverse are not Chinese, but rather Daoist "magic writing." Regarding the very large character on the left, the upper half is "magic writing" for the Chinese character lei, which means "thunder" and refers to the "God of Thunder." The lower part is "magic writing" for the Chinese character ling, which means "to order." This charm type was likely cast in the Qing dynasty.

1128. **CHINA:** AE charm (16.61g), CCH-1785, 43mm, *ci fu ya guai* (This Charm obliterates Evil) and some Taoist magic script characters either side // *abkai hafasa hūturī isibumbi* in Manchu script, VF \$100 - 150

*It is unusual to find Qing dynasty amulets or charms with Manchu inscriptions. The Manchu inscription is a direct translation of the Chinese *tian guan ci fu* (The Official of Heaven bestows good fortune)". Likely cast in the late Qing dynasty or early Min Guo period.*

1129. **CHINA:** AE charm (19.12g), CCH-1792, 44mm, Xuan Wu "Daoist curse charm", *lei zou sha gui jiang jing / zhan yao chu xie yong bao / shen qing feng / tai shang lao jun ji ji zhi ling* "God of Thunder (Lei) clear out and kill the ghosts and send down purity. Behead the demons, expel the evil and keep us eternally safe. Let this command from Lao Zi be executed quickly." // Daoist "magic writing" at left, at right is the Daoist god Zhenwu, also known as the Perfected Warrior, VF \$100 - 150

During the Han Dynasty Zhenwu was known as Xuanwu and was depicted as a tortoise encircled by a snake. This symbol represented the north direction. Over the centuries this symbol gradually evolved and by the Song Dynasty had developed into the very popular warrior god Zhenwu associated with healing and protection. This example was cast in the Qing Dynasty.

1130. **CHINA:** AE charm (22.98g), CCH-1816, 46mm, "Five Poisonous Creatures" charm, Liu Hai or Zhong Kui standing right, auspicious spider above, three-legged toad below, snake, lizard, and tiger // *qu xie jiang fu* (expel evil and send down good fortune) and four auspicious bats in ornamental element, VF \$100 - 150

One of the most dangerous and inauspicious days of the year in ancient China was the 5th day of the 5th month, according to the lunar calendar. This day marked the beginning of summer which by midseason meant dangerous animals and insects, the spread of infectious diseases, and the appearance of evil spirits. Charms of these types were often hung in Chinese homes to protect the family from evil spirits and poisonous animals associated with this unlucky day. This example was likely cast in the Qing Dynasty.

1131. **CHINA:** AE charm (33.45g), CCH-1885, 48mm, Lei Ling "Daoist curse charm", *lei zou sha gui jiang jing / zhan yao chu xie yong bao / shen qing feng / tai shang lao jun ji ji zhi ling* which translates as "God of Thunder (Lei) clear out and kill the ghosts and send down purity / Behead the demons / Expel the evil and keep us eternally safe / Let this command from Lao Zi be executed quickly" // eight trigrams with inscription *qian kan gen zhen xun li kun dui* around, square hole at center, Fine \$75 - 100

*The large characters at the extreme right and extreme left of the obverse are not Chinese, but rather Daoist "magic writing." Regarding the very large character on the left, the upper half is "magic writing" for the Chinese character *lei*, which means "thunder" and refers to the "God of Thunder." The lower part is "magic writing" for the Chinese character *ling*, which means "to order." This charm type was likely cast in the Qing dynasty.*

This charm type was likely cast in the Qing dynasty.

1132. **CHINA:** AE charm (68.58g), CCH-1990 var, 68mm, "Lao Tzu Talisman" (*tai shang fu shen*) type charm, *tai shang zhòu yu // xuán wu zhen jun* (Lao Tzu curse spell // Lord Xuanwu), a very lovely ghost charm with light porosity from burial, VF, RR \$200 - 400

In the Catalog of Chinese Charms, it is a 3rd-class charm and rated "precious and rare". In the Catalog its diameter is 75.6mm, whereas this example is smaller and perhaps belongs to an earlier type. Considering the reverence the ancient people had for gods and spirits, I feel it is more appropriate to call this Xuán Wú Zhēn Jūn // Tài Shàng Zhòu Yú, as after all the ancient people would first revere the gods, and then chant the curse spell. Lao Tzu curses: the heaven is round and the earth is square, the six laws and nine rules (i.e. the legal code of the Han Dynasty), [place] this talisman everywhere, and all ghouls be gone. Execute this order at once, and let this talisman take effect. Likely cast from the Song through Yuan dynasties.

Due to the high value of tea in many parts of Asia, tea bricks were used as a form of currency throughout China, Tibet, Mongolia, and Central Asia. Tea bricks were in fact the preferred form of currency over metallic coins for the nomads of Mongolia and Siberia in the early 20th Century. The average brick was valued at 1 Szechuan-Tibet rupee or 8 ga-den tangkas.

Cole Collection \$80 - 120

In 1936, the Republican government purchased a large number of aircraft from the United States and reorganized its air force. Five Special Agent brigades were established to protect air force facilities against Japanese air raids, often by means of anti-aircraft machine guns. The brigades were disbanded after the war in 1946, and agents with ten years of service were reportedly given medals with the gold star.

These countermarked coins were borne out of the Ottoman Empire's chronic shortage of silver coin, the production of which had come to a halt under Mehmet IV. This countermarked issue represents an effort to curtail the peddling of debased European silver coins as their higher purity relatives in Ottoman markets, while permitting the older pieces of good silver to circulate unhindered. Accepted at the rate of 1/8 of a Spanish Piece of Eight (hence the name *timmin*, derived from the Arabic turn, "eighth"), these countermarked pieces essentially served as the backbone of an economy in crisis. These were likely countermarked in Smyrna (Izmir).

The Danish Prince-Archbishop Frederick II had to resign as Administrator in both Bremen and Verden after the Second Peace of Brömsebro on August 13, 1645. He then succeeded his late father on the Danish throne as Frederick III of Denmark in 1648. The political entities of the Prince-Archbishopric of Bremen and the Prince-Bishopric of Verden were transformed by the Peace of Westphalia in 1648 into the Duchy of Bremen and the Principality of Verden.

The denomination is also known as a 1/16 reichsdaler (reichsthaler), dreigröschler, or düttchen.

1546. **BRUNSWICK-WOLFENBÜTTEL: Frederick Ulrich**, 1613-1634, AR thaler, 1630, KM-52.5, 'Wildman' type, variety with inner pearl border and flowers, EF \$375 - 425

The concept of the Wildman dates back to mythological beings in the ancient cultures of Greece and Rome. Moritz Wormser's November 1916 article in The Numismatist states that "he is a descendant of the Greek Satyr and the Roman Faun." Throughout medieval Europe, the Wildman was used to instill fear in the local villagers to subscribe to certain religious beliefs. The Brunswick Duchies of north-central Germany are located in the silver rich region that includes the Harz Mountains. The myth that was created adapted the Wildman as a local guardian who protected the silver from would-be thieves. No matter which Wildman myth one hears, he is usually depicted the same: large and muscular, nude, or nearly so, and covered in thick body hair, often wearing a wreath of leaves around his loins and as a crown about his brow.

From 1624, daler were issued in copper as well as silver. Because of the low value of copper, large plate money (plåtmynt) was issued. These were rectangular pieces of copper weighing, in some cases, up to several kilograms. They circulated until 1776. As silver became scarce, the silver daler rose in value relative to the copper daler, with the exchange rate between the two eventually being set at a ratio of 3 to 1. Denominations in copper money were marked K.M. or KMT, with S.M. or SMT denoting silver money. The cumbersome size and weight of plate money eventually prompted Sweden to become the first country in Europe to issue banknotes.

1731. **CHILE: Valdivia,** AR 2 reales, 1822, KM-2, local emergency issue, devices reengraved, PCGS graded XF Details \$800 - 1,000

Valdivia was a formerly prosperous colonial city and was heavily looted during the struggle for Chilean independence in 1820. Without enough coinage for daily commerce and payment to the local garrison, the governor was forced to collect silverware and any other silver items available from merchants and other residents in order to make coins. Some 4000 ounces of silver were amassed and sent to a new facility on an estate known as Chunimpa, under the supervision of its owner, Don Antonio Adiazola. The coins thus produced were known as "chunimpanas." Striking took place in 1822, in the denominations of 1, 2 and 8 reales, with a simple design consisting of the denomination, VA and date on the obverse and a column and three stars on the reverse. Because these "emergency" coins were unofficial and not even proper weight for their values, they were all called in by the Chilean government and melted. For that reason, surviving specimens are generally quite rare.

It was usually crafted by the Nsapo people who thrived industrially from iron and copper. The axe is forged from iron while the handle is made of wood covered in copper. Then there is "Gau" or "Gaw", a necklace of shells, up to 10 feet in length. The shells come from Canet, an island near Ponape, from Ponape itself and from Euripik. Since these come from a distance, Gau is worth more than Mmbul. "Yar" is money made of large shells about eight inches wide, pierced and tied on a coconut rope. Finally, "Reng" is the name of money made of turmeric, which is ground and mixed with water and the paste shaped into a ball, typically used for tribal ceremonies. The gold-lipped pearl oyster (*Pinctada maxima*, "kina" in local languages) was once a currency of considerable value. Harvested from distant islands, it was most prized by the highland tribes and used for the purchase of pigs and brides, as well as display of male wealth. When the first Europeans advanced into the highlands in the early 1930's, few kina shells had yet found their way there from the coast; only some very rich men owned them. One ordinary shell was worth a whole pig weighing 200 lbs, and the price for a bride was two or three fragments of a shell, plus a pig and some other valuable items. Within 10 years, the value of the shells would plummet, as white prospectors began to give them out for services

and food. A superior kina would only buy a small pig, and a good price for a bride had risen to 10 shells and 10 pigs. By the 1960's, marriage payments consisted of 60 to 100 shells plus 10 pigs, and by 1985 the shells were no longer used as currency. But such was the kina's cultural significance that it was adopted as the name of the national currency in 1975 (= 100 toea).

Culturally and linguistically distinct from their Austronesian neighbors, the people of Rossel Island boast one of the most complicated monetary systems in the world. There are two kinds of shell money in use, *ndap* and *ké* (as well as secondary valuables such as greenstone axes). *Ndap* are single flat shells of polished *Spondylus* and are known as men's money, while *nko* are strings of ten discs made from *Chama* shell and known as women's money. The former come in 22 different grades, with the high-ranking ones usually smaller and worn to a delicate shape and patina through generations of handling. Those pieces are known by individual names to the islanders, who treated them with religious reverence and reserved them for specific purposes. For instance, number 18 is used in payment for wives, while a number 20 was used as compensation for ritual murder. The higher pieces are loaned, rather than traded, and paid back with interest, sometimes over the span of several years. It has been called a form of prestige currency and is not directly comparable to Western monetary systems.

Among the Motu and Koita, near Port Moresby, they are highly valued, and nowadays attain very high prices, much more than is paid for the same article among the Massim." Tevau (teau) feather coil money is composed of some 50,000 to 60,000 red feathers of the scarlet honeyeater bird (*Myzomela cardinalis*). It was used as a currency in bridal transactions and for other large expenditures on the Islands of Santa Cruz in eastern Melanesia. Depending on the condition and the visibility of the red feathers, the coils were valued differently. A first grade coil had to be brilliantly red. Until the mid-20th century, the bride price was ten coils of different grades. For that, some families ran up debts for the rest of their lives. Only hereditary currency binders were authorized to make feather coils. A full coil could take them 500 to 600 man-hours, making it prohibitively expensive. It ceased to be used as money in the late 1970s but continues to serve as indicators of value and objects of prestige till this day.

Malaitan shell-money, manufactured in the Langa Langa Lagoon, is the traditional currency used in Malaita Island and throughout the Solomon Islands. The money consists of small, polished shell disks which are drilled and placed on strings. It can be used as payment for bride price, funeral feasts, and compensation, with the shell-money having a cash equivalent value. It is also worn as an adornment and status symbol. The standard unit, known as tafuliae', is still produced by the people of Langa Langa Lagoon, but most are inherited, from father to son. This example consists of ten strands of red, white and black disks - about 1300 individual pieces in all. The tafuliae' is still part of the bride price on Malaita; only new creations can be used such as this example whereas old Tafuliae' are not accepted. The collector purchased this example in 1995 when he and his wife visited Auki on Malaita Island and the photo in his book shows Karen Opitz holding this example!

1953. **SOLOMON ISLANDS:** LOT of 2 pieces of Melawei clam shell ring, 102mm and 108mm (4") in diameter, lot of 2 items, ex Charles Opitz Collection \$100 - 200

The common name for shell rings in the Western Solomons is poata, which simply means "money." In addition, however, the different forms of rings have different names: bakia are yellowish rings, umbu are rings of large dimensions. This ring is a mbarake, a type of ring where the natural clam shell contours often distort the shape. The surface is rough, and the mbarake rings are normally larger than the other kinds of poata. Mbarake were used as money with relatively fixed values for bride price payments and land purchases. Some locals regard them as the oldest form of money in the Western Solomon Islands. And even though the mbarake look rather poor compared to many other poata, they are among the most valuable ring forms.

1959. **TAIWAN:** jacket money "cloth", Opitz pg. 166-67 (lower plate example), Dubin pg. 237, 89 x 35cm (35" x 13 3/4"), made from more than 30,000 small polished shell and stone beads (by our conservative estimation) by the Atayal people ca. late 19th century, EF, RRR, ex Charles Opitz Collection \$1,000 - 1,500

Each "money jacket" is made of some 2,600 strings of beads, each string consisting of 20-25 beads of polished shell or stone. The beads are sewn onto rectangular pieces of cloth, which are in turn sewn together to make the jacket. Due to its labor-intensive production, a complete jacket was a status symbol in Atayal society and worth five cattle and several wives. One example of this rare item can be found in the Shanghai Museum.

The Atayal (Tàiya) are one of the several indigenous tribes of Taiwan (collectively called Gaoshan or "High Mountain" people in Mandarin Chinese) and have inhabited the island for over 5,000 years. They are a part of the Austronesian family that would migrate across Southeast Asia and settle as far away as Madagascar and Easter Island (Rapa Nui).

2359. **GIRAY KHANS: Shahin Giray**, 1777-1783, BI kara-onluk (2.77g), Baghcha-Saray, AH1191 year (4), A-R2116, Ret-79var, Sariev-69, denomination means "black ten paras", regnal year confirmed by die-link, rare denomination, some porosity, mainly on the obverse, VF, **RR**, *ex Dick Nauta Collection* \$100 - 130
2360. **GIRAY KHANS: Shahin Giray**, 1777-1783, BI kara-beshlyk (1.44g), Baghcha-Saray, AH1191 year 2, A-2116, Ret-19, standard type, but a superb example with almost no weakness, rare in this quality, EF-AU, *ex Dick Nauta Collection* \$80 - 120

The billon kara-beshlyk is the most common of all the coins of Shahin Giray. In his massive publication, Valentin Sariev has catalogued these in great detail, year 2 (his types #77-115), year 3 (#116-235), and year 4 (#236-311), which is essentially a die analysis, far too tedious for the average collector, and ignored here for the less expensive coins. The consignor has assigned Retowski numbers for most of his coins of Shahin Giray, which we have indicated here.

2361. **GIRAY KHANS: Shahin Giray**, 1777-1783, BI kara-beshlyk (1.66g), Baghcha-Saray, AH1191 year 3, A-2116, Ret-65var, scarce subtype, with the dynastic tamgha in the obverse center, average strike, EF, *ex Dick Nauta Collection* \$60 - 90
2362. **GIRAY KHANS: Shahin Giray**, 1777-1783, BI kara-beshlyk (1.44g), Baghcha-Saray, AH1191 year 3, A-2116, Ret-75, Sariev-218, this type almost always cites the accession year 1191, but on a few examples, the engraver inadvertently cut 1194, with 3 small vertical lines instead of the regnal year "3" atop the obverse, central weakness, VF, **RR**, *ex Dick Nauta Collection* \$80 - 120
2363. **GIRAY KHANS: Shahin Giray**, 1777-1783, BI kara-beshlyk (1.27g), Baghcha-Saray, AH1191 year 4, A-2116, Ret-90, with the regnal year "4" on the reverse, to the left, instead of its usual position at the top of the obverse, average strike, VF, **RR**, *ex Dick Nauta Collection, from our pricelist #29, lot 101* \$70 - 100

This type has been incorrectly assigned various other names, mostly commonly "para", but in his research, Sariev has concluded that it was called a "kara-beshlyk", which means "black five [para]" and was equivalent to one akçe.

2364. **GIRAY KHANS: Shahin Giray**, 1777-1783, AE kymis (46.25g), Baghcha-Saray, AH1191 year 5, A-A2118, Ret-128 obverse and 172 reverse, 2nd series, some weakness of strike, VF, **R**, *ex Dick Nauta Collection* \$100 - 130
2365. **GIRAY KHANS: Shahin Giray**, 1777-1783, AE kopeck (9.56g), Baghcha-Saray, AH1191 year 4, A-A2119, Ret-143, 2nd series, nice strike, attractive VF, *ex Dick Nauta Collection* \$70 - 100
2366. **GIRAY KHANS: Shahin Giray**, 1777-1783, AE kopeck (9.32g), Baghcha-Saray, AH1191 year 5, A-A2119, Ret-205/209, Sariev-437, 2nd series, scarce date, decent strike, VF, *ex Dick Nauta Collection* \$60 - 90
2367. **GIRAY KHANS: Shahin Giray**, 1777-1783, AE kopeck (13.69g), Baghcha-Saray, AH1191 year 5, A-2119, Ret-240, 3rd series, nice even strike, VF-EF, *ex Dick Nauta Collection* \$80 - 110

The 3rd series kopeck is distinguished by both its heavier weight and the oblique reeded edge instead of the floral pattern edge. The regnal year 5 is scarce, years 6 and 7 are both very rare.

2368. **GIRAY KHANS: Shahin Giray**, 1777-1783, AE denga (4.66g), Baghcha-Saray, AH1191 year 4, A-A2120, Ret-155, Sariev-444, 2nd series, edge with floral edge, harshly cleaned, strong VF, **RR**, *ex Dick Nauta Collection* \$60 - 90

End of Auction

TERMS OF SALE

1. Auction Basics. This is a public auction sale conducted by California bonded auctioneers, Stephen Album Rare Coins Inc. (hereinafter referred to as "Auctioneer"). Bidding in this Auction constitutes acceptance by you (the "Bidder") of all the Terms of Sale stated herein. Bidders may include consignors who may bid and purchase lots in the Auction consigned by the consignor or by other consignors pursuant to their consignment agreement. The Auctioneer reserves the right to include in any auction sale its own material. Bidder acknowledges and agrees that the Auctioneer may not be required to pay a Buyer's Premium, or other charges that other Bidders may be required to pay and may have access to information concerning the lots that is not otherwise available to the public. Any claimed conflict of interest or claimed competitive advantage resulting there from is expressly waived by all participants in the Auction. Lots may carry a Reserve. A Reserve is a confidential price or bid below which the Auctioneer will not sell an item or will re-purchase on behalf of the Consignor or for Stephen Album Rare Coins Inc. The Buyer is the Bidder who makes the highest bid accepted by the Auctioneer, and includes the principal of any Bidder acting as an agent.

2. Descriptions and Grading. Grading of rare coins is subjective and may differ among independent grading services and among numismatists, even though grading has a material effect on the value of the coins. Stephen Album Rare Coins Inc. is not responsible for the grades assigned by independent grading services, and makes no warranty or representation regarding such grades. Bidder further acknowledges and agrees that grades assigned by Stephen Album Rare Coins Inc. and lot descriptions are based solely upon an examination of the coins and are intended to note any perceived characteristics. Stephen Album Rare Coins Inc. does not warrant the accuracy of such grading or descriptions. All photographs in this catalog are of the actual items being sold but may not be the actual size or to scale.

3. The Bidding Process. The Auctioneer shall have the right to open or accept the bidding on any lot by placing a bid on behalf of the Consignor or their agent, a Bidder by mail, telephone, internet or fax, or any other participant in the Auction. Bids must be for an entire lot and each lot constitutes a separate sale. No lot will be broken up unless otherwise permitted by the Auctioneer. Lots will be sold in their numbered sequence unless Auctioneer directs otherwise. All material shall be sold in separate lots to the highest Bidder as determined by the Auctioneer. Auctioneer shall have the right in his or her sole and absolute discretion to accept or decline any bid, challenge any bid or bidding increment, to reduce any mail bid received, adjudicate all bidding disputes and to determine the prevailing bid. The Auctioneer shall have the right, but not the obligation, to rescind the acceptance of any bid and place the lot(s) for Auction again. Auctioneer's decision on all bidding disputes shall be binding and final. For the mail and internet Bidder's protection, no "unlimited" or "buy" bids will be accepted. When identical bids are received for a lot, preference is given to the first bid received as determined by the Auctioneer. A mail bid will take precedence over an identical floor bid; a Floor Bidder and Telephone Bidder must bid higher than the highest mail bid or pre-sale internet bid to be awarded any lot. Bids will not be accepted from persons under eighteen (18) years of age without a parent's written consent which acknowledges the Terms of Sale herein and agrees to be bound thereby on behalf of the underage Bidder. The auction sale is complete when the Auctioneer so announces it.

Absentee bids may be placed by fax, mail, email, or by telephone. Online bidding is also available on www.iCollector.com. Follow the link on our website, www.stevealbum.com in order to bid online. Your bids will be treated as a maximum bid. The winning bid will be one increment above the next highest bidder, or at the starting bid.

Stephen Album Rare Coins Inc. is not responsible for any errors in bidding. All Bidders should make certain to bid on the correct lot and that the bid is the bid intended. Once the hammer has fallen and the Auctioneer has announced the Buyer, the Buyer is unconditionally bound to pay for the lot, even if the Buyer made a mistake. Stephen Album Rare Coins Inc. reserves the right to withdraw any lot at any time, even after the hammer has fallen, until the Buyer has taken physical possession of the lot. No participant in the Auction shall have a right to claim any damages, including consequential damages if a lot is withdrawn, even if the withdrawal occurs after the Auction.

4. Buyer's Premiums and Payments. A Buyer's Premium of twenty percent (20.0%) will be added to the hammer price for each lot to all successful bids. Accepted payments are by Visa, MasterCard, American Express, PayPal, cash, cashier's check, money order, approved personal check or bank wire transfer. If the purchaser pays by credit card (including credit-debit cards) or by PayPal, an additional service fee of three percent (3.0%) will be added. This service fee will apply to the hammer price, buyer's premium, shipping, and sales tax. A reacquisition charge may apply to Consignors pursuant to a separate agreement, which may be higher or lower than the Buyer's Premium. Payment is delinquent and in default if not received in full, in good funds, within fourteen (14) calendar days of the Auction (the "Default Date"), without exception, time being of the essence, unless otherwise agreed in writing prior to the Auction. Any bidder who does not pay within the standard deadline of fourteen (14) calendar days, regardless of any approval of alternative payment arrangements, may be considered a negligent payer and may be subject to increased scrutiny and additional requirements in order to participate in future auctions. If a credit card is provided before the sale, Stephen Album Rare Coins reserves the right to charge your credit card for the total of your auction purchases if payment has not been received within the fourteen (14) calendar days deadline. All auction sales are payable strictly in immediately available good U.S. funds, through a bank in the United States. Personal checks must clear our bank before lots are delivered. Bounced or returned checks are subject to a \$35 fee.

Payments by PayPal are restricted to a maximum of \$5,000 per client. Payments by credit card are restricted to a maximum of \$10,000 per invoice. If a credit card has been used to pay for one invoice from the auction, it may not be used to pay for another invoice in the auction, regardless of the total amount of either invoice. We reserve the right to modify these payment limits, and we reserve the right to refuse payment by credit card or PayPal at our discretion, in which case a bank wire, check, or cash equivalent will be required.

Please contact Stephen Album Rare Coins Inc. for wiring instructions. Please inform us after bank wire has been sent. Please be advised that payments coming by wire transfer usually only take a few days to arrive, but in rare cases they can take up to a few weeks to arrive due to US government regulating, resulting in a delay of shipment of your lots. Lots will not be shipped until your full payment has arrived in our bank account. There is a \$15 fee for all bank wire transfers.

Stephen Album Rare Coins Inc. reserves the right not to release lots for which funds have not yet been received in full. On any past due accounts, Stephen Album Rare Coins Inc. reserves the right, without notice, to extend credit and impose carrying charges of 1% per month. Buyers agree to pay reasonable attorney's fees and cost incurred to collect past due accounts. Buyers personally and unconditionally guarantee payment in full of all amounts owed to Stephen Album Rare Coins Inc. Any person submitting bids on behalf of a corporation or other entity, by making such bid, agrees to be personally liable for the payment of the purchase price and any related charges and the performance of all Buyer obligations under these Terms of Sale and Stephen Album Rare Coins Inc. reserves the right to require a written guarantee of such payments and obligations.

Lots are not available for pickup during the auction. Lots may be available for on-site pickup on the Monday following the sale if a formal request for pickup is provided by the Buyer before the auction, during the auction, or within 1 hour of the close of the final lot on the final day of the auction. We reserve the right to refuse this request for pickup, at our discretion. For on-site pickup, we will only accept cash or a bank transfer. If paying by bank transfer, the funds must reach our account before we will allow you to collect your lots.

5. Credit. Bidders who have not established credit with Stephen Album Rare Coins Inc. must furnish satisfactory credit references and/or deposit at least twenty-five percent (25%) of their total bids for that Auction session(s) or such other amount as Stephen Album Rare Coins Inc. may, in its sole and absolute discretion, require before any bids from such Bidder will be accepted. Deposits submitted will be applied to purchases. Any remaining deposits will be promptly refunded, upon clearance of funds.

6. Shipping and Insurance. It is the Buyer's responsibility to contact Stephen Album Rare Coins Inc. after the sale to make shipping and packaging arrangements. Due to the fragile nature of some lots, Stephen Album Rare Coins Inc. may elect not to assume responsibility for shipping or packing, or may charge additional shipping and handling. All state taxes, postage, shipping, handling, insurance costs, the Buyer's Premium, and any other fees required by law to be charged or collected will be added to the invoice for any lots invoiced to Buyer. Title and risk of loss pass to the Buyer at the destination upon tender of delivery. Acceptance of delivery constitutes acceptance of the purchased lots. Inspection of the purchased lots is not required for acceptance. Any and all claims based upon Buyer's failure to receive a purchased lot, Buyer's receipt of a lot in damaged condition, or otherwise related to delivery, must be received in writing by Stephen Album Rare Coins Inc. no later than thirty (30) days after payment. The failure to make a timely claim, time being of the essence, shall constitute a waiver of any such claim.

Delivery outside the USA will be by USPS registered mail, express mail or by FedEx and will include insurance on all shipments up to \$50,000. Buyers will be billed additional insurance charges on a shipment or combined shipments valued at above \$50,000. Any claims of loss or damage will only be paid by Stephen Album Rare Coins Inc. only after the insurers' investigation is complete. If the Buyer opts for another form of shipment other than the above, items will be shipped at their risk and they will assume all risk due to theft, damage or loss. A Buyer opt out of the Stephen Album Rare Coins Inc. standard shipping listed above must be in received in writing before shipment will be made.

Stephen Album Rare Coins Inc. cannot accept any responsibility whatsoever for customs duties charged by the country of destination or seizure of items by customs, domestic or foreign.

Buyers will be charged all applicable sales tax, including Buyers who pick up at this Auction or shipments to Buyers in California without a valid Resale Certificate which has been provided to the Auctioneer. Please note that the purchase of any coin or bullion lot(s) with a price, including the Buyer's Premium, in excess of One Thousand Five Hundred Dollars (\$1,500) are exempt from California sales tax. On any tax not paid by Buyer that should have been paid, even if not collected by Stephen Album Rare Coins Inc. by mistake, error, negligence or gross negligence, Buyer remains liable for and agrees to promptly pay the same on demand together with any interest or penalty that may be assessed.

7. Financial Responsibility. In the event any applicable conditions of these Terms of Sale herein are not complied with by a Buyer or if the Buyer fails to make payment in full by the Default Date, Stephen Album Rare Coins Inc. reserves the right, in its sole discretion, in addition to all other remedies which it may have at law or in equity, to: (a) rescind the sale of that lot or any other lot or lots sold to the defaulting Buyer, retaining all payments made by Buyer as liquidated damages, it being recognized that actual damages may be speculative or difficult to compute, or (b) resell a portion or all of the lots held by Stephen Album Rare Coins Inc., in a commercially reasonable manner, which may include a public or private sale, in a quantity sufficient in the opinion of Stephen Album Rare Coins Inc. to satisfy the indebtedness, plus all accrued charges, and Stephen Album Rare Coins Inc. may charge a seller's commission that is commercially reasonable. More than one such sale may take place at the option of Stephen Album Rare Coins Inc. If the Auctioneer resells the lots, Buyer agrees to pay for the reasonable cost of such sale, together with any incidental costs of sale, including reasonable attorney's fees and costs, cataloging and any other reasonable charges. Notice of the sale shall be by U.S.P.S. Certified Mail, Return Receipt Requested to the address utilized on the Bid Sheet, Auction Consignment and Security Agreement or other last known address by Stephen Album Rare Coins Inc. The proceeds shall be applied first to the satisfaction of any damages occasioned by Buyer's breach, then to any other indebtedness owed to Stephen Album Rare Coins Inc., including without limitation, commissions, handling charges, carrying charges, the expenses of both sales, reasonable attorneys' fees, costs, collection agency fees and costs and any other costs or expenses incurred. Buyer shall also be liable to Stephen Album Rare Coins Inc. for any deficiency if the proceeds of such sale or sales are insufficient to cover such amounts.

Buyer grants to Stephen Album Rare Coins Inc., or assignees, the right to offset any sums due, or fund to be due to Stephen Album Rare Coins Inc., and to make such offset from any past, current, or future consignment,

or purchases that are in the possession or control of the Auctioneer or from any sums due to Buyer by Stephen Album Rare Coins Inc., its affiliates and assignees. In addition, defaulting Buyers will be deemed to have granted to Stephen Album Rare Coins Inc., or its assignees, a security interest in: (x) the purchased lots and their proceeds, and (y) such sums or other items and their proceeds, in the possession of Stephen Album Rare Coins Inc., its affiliates or assignees, to secure all indebtedness due to Stephen Album Rare Coins Inc., plus all accrued expenses, carrying charges, attorney fees, and costs, until the indebtedness is paid in full. Buyer grants Stephen Album Rare Coins Inc. the right to file a UCC-1 financing statement for such items, and to assign such interest to any affiliated or related company or any third party deemed appropriate by Stephen Album Rare Coins Inc. If the auction invoice is not paid for in full by the Default Date, a carrying charge of one percent (1%) per month may be imposed on the unpaid amount until it is paid in full. In the event this interest rate exceeds interest permitted by law, the same shall be adjusted to the maximum rate permitted by law, and any amount paid in excess thereof shall be allocated to principal. Buyer agrees to pay all reasonable attorney's fees, court costs and other collection costs incurred by Stephen Album Rare Coins Inc. or any affiliated or related company to collect past due invoices or to interpret or enforce the terms hereof or in any action or proceeding arising out of or related to the Auction. Stephen Album Rare Coins Inc. reserves the right to assign its interest to any third party. To the extent that the Buyer for any lot consists of more than one person or entity, each such person or entity is jointly and severally liable for all obligations of the Buyer, regardless of the title or capacity of such person or entity. Stephen Album Rare Coins Inc. shall have all the rights of a secured party under the California Uniform Commercial Code and all rights of the consignor to collect amounts due from the Buyer, whether at law or equity.
