Vespasian ascended the throne of Rome in the same year. According to the historian Suetonius, the Emperor's younger son Domitian had affairs with many women. Having succeeded in attracting Domitia's attention, Domitian seduced her and abducted Domitia from her husband, Lamia, forcing them to divorce. Domitian later had Lamia executed. He married Domitia at the end of the same year. Domitia bore Domitian a boy at 71 and a girl at 74. The boy, named Titus Flavius, died in 81. The girl, whose name is unknown, also died young. With Domitian's accession to the throne as the new Roman Emperor in 81, Domitia was now the new Empress of Rome. Domitian honored her with the title of Augusta. **40**

Both the semissis and tremissis of Anastasius II without his given name, Artemius, are known from unique published specimens; the only other tremissis is in the Dumbarton Oaks collection. Artemius was protasekretis, or chief of staff of the imperial court at the time of the overthrow of Philippicus on 3 June 713, and appears to have gained the throne solely due to the lack of another viable candidate. He took the throne name of Anastasius upon his coronation the next day. Judging by their extreme rarity, coins with his throne name alone may have been produced for only a few weeks or even days. The Constantinople mint quickly went over to the standard "Artemius Anastasius" type, although the western mints were more flexible in their legend construction. Anastasius II proved an energetic ruler during his brief reign, preparing for the looming conflict with Arab armies in Asia Minor, but the still-disaffected Opsikion troops deposed him after less than two years in favor of the non-entity Theodosius of Adramyttium. Anastasius fled to sanctuary at a monastery in Thessalonica, but in 719 returned to Constantinople at the head of a mercenary army of Bulgars. The fratricidal confrontation between Anastasius and Leo III was headed off when the Bulgars betrayed him to Leo, who had him beheaded. **240**
