- 136** ATTICA. Athens, AR, Tetradrachm. 515 BCE - 482 BCE Obv: Athena head of right; archaic style. Rev: ΑΘΕ. Owl standing, right; head facing, behind olive sprig. The first era of Athenian owls, coins struck during the Archaic period of Greek art, began about 515 B.C. and continued through the early fifth century. These issues are characterized by their thick, compact planchets and a crude, but visually striking style. Athena, wearing a crested helmet, appears for the first time on the obverse as a crudely executed bust. Athena and her owl are marked by almost cartoonish qualities in both appearance and proportion. Because of this early style, which is also evident in our impressive specimen (Seltman Group E, 'Paeonian mint'), Seltman has argued that such tetradrachms were issues from mints in the Attic or Thracian hinterlands, or Paeonia, where there were less skilled engravers. But this suggestion was disproved. Ref: Asyut Hoard Group VI; HGC 4, 1591. Condition: EF. Weight: 17.35 g. Diameter: 22.50 mm. **40**

The most common examples of Assos are the griffin and the lion head group. In this group, instances where the lion's head and the griffin look in opposite directions are extremely rare. The coins of Assos with these types are mostly obol. This example is extremely rare in that the types look in different directions. It is also one of the lesser known drachmi examples of Assos. lightly loved toned, the lines are clearly processed. **40**

194 TROAS. Assos (circa 500-440 BC). AR Drachm. Obv: Satyr; bearded, curly hair, muscular legs and arms; running right. in archaic style. Rev: Head of lion, right; roaring and tongue out; within square incuse. Bucephalus Numismatic Auction 4, Lot 171; BMC 1 = Traité I 691 (Termera in Caria); HPM pl. XVII, 21 (Thraco-Macedonian) = De Luynes 1529 (Lete in Macedon). Extremely RARE. Condition: Good VF. Weight: 3.83 g. Diameter: 14.67 mm. The reverse type elaborate in style, head of a roaring lion with protruding tongue facing right and in an incuse square, is stylistically quite similar to that shown in drachms with griffin of Assos. These very rare drachms without the ethnic should be attributed to Assos. Also, the cultic connections of the satyr in Assos is another evidence. A nymph head is depicted in Assos' obols (with and without the Assian ethnic) dated to 430-410 BC (see for example Gorny&Mosch, Au 212, lot 1747). The nymph and satyr types may both be related to a local Aegean cult, in Assos possibly connected to a spring such as the one monumentalized in Roman times (and still pouring water) that can be seen by the sea close to the harbour (for the nymph type, L. Lazzarini, Assus Troadis: the beginning of coinage and its later silver emissions in the V and IV century BC, p. 37). **40**

687 ASIA MINOR, Uncertain mint. (Probably Caria, Lydia or Phrygia). Uncertain Emperor. When the iconography of the figure on horseback is examined, the warrior identity comes to the fore. The folds of the cloak and tunic indicate a very careful and quality fabric. Such elaborate clothing and shoes were reserved only for the nobility. Owning a horse was a sign of nobility for the Romans. Considering the equestrian emperor figures seen on 1st and 2nd century Roman coins, it is likely that this figure was an emperor. Given all these details, this suggests that the figure on horseback was an emperor. This medalion depicts the imposing image of an emperor who has won important victories on the battlefield. Especially the cutting line under the feet of the horse shows that this practice is based on the emperor type in the 1st and 3rd century coins. Condition: Good VF. Weight: 72.11 g. As a prize he received fifty youths and as many maidens, and the king, in obedience to an oracle, gave him also a dappled cow and bade him found a city wherever the animal should lie down; so he followed the cow. This was copied for the Villa Medici in Rome, where the image was known as "Venus Medici." The type also appears on coins, especially in Asia Minor, in the later second and early third centuries. Born into a Balkan peasant family, Petrus Sabbatius was brought to the capital by his uncle Justin who sponsored his education and career. Justin adopted his nephew, who in honor of his uncle took the name by which he is known to history, Justinian. Justinian. In 527 Justin became emperor, with Justinian acting as his closest advisor. When Justin died his nephew succeeded him, and over a reign of thirty-eight years guided his empire to the apogee of its power and oversaw a flowering of later Roman culture. In all areas Justinian attempted to strengthen and unify his empire. On coins, the most important innovation of Justinian was the introduction of the dated follis, which appeared in year 12 (538/9), depicting a frontal bust that replaced a right-facing one, as on his seals. Mint activity was vastly increased, with twice as many operating as during his uncle's reign. **40**

Tiberios Constantine's successor in the post of Count of the Excubitors, then as caesar and emperor, Maurice attempted to adapt Justinian's empire to changing financial and strategic realities. Earlier in his career Maurice had achieved notable successes in the East against the Persians, one of the few Byzantine commanders to do so for some time. Byzantine success was seriously undermining Avar strength and their confederation looked to be close to collapse. Then in 602, to save money, Maurice ordered his troops to winter north of the Danube, in enemy territory. The troops rebelled and marched on Constantinople, where, with the help of the circus factions, they overthrew and killed Maurice after murdering his sons. There is a peculiar fluidity in the order of his names on the seals and coins; the majority read "Mauricius Tiberius," but a few reverse it to "Tiberius Mauricius."

He had to fend off Theodore's brothers, who believed that they had the better claim for the throne. John was an able administrator and fiscal manager. He encouraged his realm to be self-sufficient, discouraging or banning Western imports, and encouraged his subjects to carefully manage their lands and farms. He led by example, demonstrating his success by buying his wife a jeweled crown from the proceeds of selling eggs. John died in 1254 and was remembered fondly by his people; the inhabitants of Asia Minor revered him as a saint soon after his death. John has the title despotes and is identified by the name of Doukas. Although John III's father was a Vatatzes, he chose the name Doukas on his seals. This would associate John with the imperial dynasty of the eleventh century as well as with the Komnenos clan. **40**

The reign of Andronikos II marks the point at which Byzantium truly declined to the rank of a second-rate power. One of Andronikos's first actions was to save money by scrapping his father's successful fleet, a mistake that would leave Byzantium at the mercy of the maritime powers of Italy. The shortsightedness of Andronikos's cutbacks was demonstrated when Byzantium was drawn into a war with Venice and found itself unable to resist the Italian fleet's attacks. **40**

Francesco Dandolo was the 52nd Doge of Venice. He ruled from 1329 to 1339. He died in 1339. During his reign Venice began its policy of extending its territory on the Italian mainland. The Dandolo family played an important role in Venetian history from the 12th to the 15th century. Historical references to the family go as far back as the 11th century; however, the family is not considered to be one of the so-called old families (case vecchie) of Venice, as it does not appear on the list of the founding families of Venice. Dandolo was one of the most successful Venetian diplomats. Dandolo was nicknamed cane (dog) after an incident in which he presented himself to the pope wearing a chain around his neck in an attempt to get the pope to revoke the excommunication of Venice. Grosso examples of silver samples of this coin are known. But this coin is quite unique, weighing 4.32 g. This coin must have been minted in gold as a copy based on silver samples **40**

According to his great-grand daughter, Anna Komnene, Manuel had been appointed “Strategos autokrator of the East” to deal with the rebellion of the Bardas Skleros, be it militarily or diplomatically. His eldest son, Isaakios Komnenos, became emperor in 1057-1059. Manuel owned lands near Kastamonu (in Paphlagonia), which Isaakios inherited from him (PmbZ Online, 24885). Translation: Michael Doukas, autokrator of the Romans. On this specimen one can clearly discern that the emperor's labarum is decorated in the middle with a device consisting of five pellets. Cf. BLS I 95c-d; Seibt & Zarnitz 3.2.4; DO Seals 6, no. 84.6. Michael VII is the eldest son of Constantine X Doukas and Eudokia Makrembolitissa. After the defeat at Mantzikert in 1071, he gained the throne, but his reign was one of economic and military disaster. Michael's reign saw a series of rebellions staged by pretenders to the throne. Economically, the reign saw a rapid and deep debasement of gold, and the reduction of the measure of wheat (modios) by a quarter (para pinakiou), which effectively raised the price of wheat by a third. These economic changes attest to the high level of inflation in the 1070s, and earned Michael the nickname "Parapinakion". He abdicated in 1078 and retired into the monastery of Stoudios. The surname Kamytzes is mentioned for the first time in the tenth century by Pseudo Symeon (PmbZ 25573). The oldest certain member of the Kamytzes family in Byzantium is the military commander (strategos) Theodoros Kamitzes, with the title protospatharios epi tou Chrysotriklinou (DO 58.106.972, first half of the eleventh century). Another earliest family member whose seal is known in the first half of the 11th century is Basil Kamytzes, who bore the title of spatharokandidatos and epi tou Chrysotriklinou (DO BZS.1951.31.5.2218). The bottom right lines on the reverse of our seal does not allow clear reading; however, the Kamytzes family name seems the possible solution. If so, this seal would make an important contribution to the Byzantine prosopography and lineage of the aristocratic Kamytzes family. Condition: Near Very Fine. Weight: 10.92 g.
