 In Mesopotamian religion Shamash was the Akkadian name of the sun god, corresponding to Sumerian Utu. In mythology, Shamash was the son of the moon god Sin, and thus the brother of the goddess Ishtar, who represented the great star of Venus. In early inscriptions, Shamash's consort was the goddess Aya, whose role was gradually merged with that of Ishtar. In later Babylonian astral mythology, Sin, Shamash, and Ishtar formed a major triad of divinities, which still today plays an important role in astrological systems, though under different names.In addition to being the god of the sun, Shamash was also the deity of justice. An inscription left by King Hammurabi indicates that his famous Law code was inspired and promulgated at Shamash's command. In some cases, Shamash was seen as governing the entire universe and was pictured as a king on his royal throne with his staff and signet ring.Shamash is depicted as overcoming darkness and death. In the Epic of Gilgamesh he assisted the hero's victory over the monster Humbaba, guardian of the deep forests of Lebanon. Like the later Apollo, he made his daily journey through the heavens, either on horseback, in a chariot, or on a boat. His main cult center in Sumer was the city of Larsa, and in Akkad his primary temple was in Sippar. In Canaanite tradition, the sun god was Shemesh, the "torch of the gods," but was described as female. The worship of Shemesh/Shamash was also practiced among the Israelites, although it was forbidden by the prophets and biblical writers. **195**
