The important weight units used by the Ottomans, that is, the Ottoman Turks, were okka and dirham. The Anatolian Seljuks, who ruled much of Anatolia between the 11th and 13th centuries AD, used flat, beautifully decorated, cast, ring-shaped copper alloy weights made in decimal multiples of a dirham (roughly 3.2 g).The unit of 400 dirhams was called an okka (not to be confused with wuqiyah , Arabic for an ounce). The absolute mass of the okka could vary, depending on when and where in the empire weights were made and used. This shape was apparently used by the Great Seljuks in Iran, and from there it probably passed on to the Seljuks of Rum, and from there to the Ottomans, who used it for dirhams.
