293 ACHAIA, Achaian League. Lakedaimon (Sparta). Circa 85 BC. AR Hemidrachm). Laureate head of Zeus right / Achaian League monogram; monogram above, piloi of the Dioskouroi flanking, ΠΥ below; all within laurel wreath. Benner 15; BCD Peloponnesos 865.1; HGC 5, 643. Good VF, tone, slightly off center. Good metal. The initial phase of collecting Sparta/Lacedaemon pieces set the groundwork for the evolution of the collection. The collection was then expanded to Sparta's immediate neighbor in Messene and then to the entire Peloponnese. As I moved through the wider Peloponnesian regions I aimed, where possible, to collect an example of Achaean League coinage of the respective City States, examples of the Greek Imperial coinage and finally, Roman Provincial coinage. The goal being to develop a snapshot of the evolution of coins issued within the Peloponnese. Collecting in this way allowed for a timeline of both political and artistic change throughout the Peloponnese to be mapped out. The uniform coinage, both in silver and bronze of the Achaean league can be compared against the unique iconography of the corresponding Imperial issues and the later, highly stylized Roman issues. From a historical perspective, the evolution and membership of the League as well as the wars within the region can also be viewed through the issuing of coinage. Numismatically, the primary goals of this collection have been broadly achieved by focusing on the smaller issues of the City States within the Peloponnese, no large silver issues beyond the enigmatic Tetradrachms have representation within the collection. The product of my labors is what I believe to be a highly diverse, interesting and accessible group of coins which provides an insight into one of the most interesting periods and regions of the Ancient world. 2,50 g - 15,16 mm
