R/ Star above D N REX, B below. Metlich 95a; BMC Vandals 28-9; Ladich p. 101, 38. Good Fine. From the collection of Italo Vecchi.

611 Lombardic Kingdom of Italy, Perctarit (AD 661-2, 672-688), Milan or Pavia AR $\frac{1}{4}$ Siliqua (11mm, 0.26g,) Greek cross within linier circle engraved over king's bust, all within incuse linier border. R/ Monogram PEI between 6 pellets, cross above, ^ below, all within raised linier border. Unpublished in the standard references: for similar silver issues cf. E. Bernareggi, *Le cosidette 'siliqua di Pertarito'*, AIN 12-14, Roma 1968, pp. 119-136, cf. 1-16 and 14; MEC 1, Class A, 328: Arslan 23; BMC Vandals, p. 136, 15, pl. 19, 26; CNI pl. 38, 7-10 (Pavia). This extraordinary coin belongs to a group of Lombardic silver, typically ranging from 0.31 to 0.12 grams, characterised by very thin fabric and the monogram PER (= Perctarit Rex) probably influenced by Frankish silver deniers and the small silver issues of Papal-Byzantine Rome in the 670s. They started as $\frac{1}{4}$ siliquae with regal portraits on the obverse and gradually became uniface on a $\frac{1}{8}$ siliqua standard. They are mainly known from a hoard of 1,600 examples found in 1833 at Biella in Piedmont. The busts on the earliest specimens (Bernareggi, p. 22.3, 6; MEC 328), resemble those of the latest tremisses in the name of Maurice and the earliest coins of Cunicpert (MEC 320) and Aripert II (MEC 322). The name 'siliqua' is derived from the Greek name for the seed of the carob seed (carat). In due course it also became the Greek equivalent of the Latin siliqua and gave its conventional name to the lightest silver units from the 6th to the 8th centuries AD. The $\frac{1}{8}$ of a siliqua (or 1 carat weight), was the smallest silver denomination used in the Byzantine mints of Rome and Ravenna, cf. MIB III: Justinian I 79, Heraclius 152-157, Constans II MIB III, Contantine IV MIB 73-76, Justinian II first reign MIB III 43, Leontius I MIB 30-31 and seems to have ended with Tiberius III MIB 71-72, after which it was replaced by its copper equivalent of 30 Nummis at Rome, cf. Justinian II first reign MIB 75-77. For denomination cf. M. O'Hara and I. Vecchi, 'A find of Byzantine silver from the mint of Rome for the period AD 641-752, RSN 64, 1985, pp. 105-140, 1-20. Perctarit, was the son of King Aripert I (653-661), brother of Godepert (661-2, at Pavia), husband to Rodelinda and father of Cunicpert (662-700). When their father died in 661 Perctarit and his brother both succeeded to the Lombard kingdom, Perctarit with his capital in Milan, Godepert in Pavia. Their quarrels and attacks on one another's territory began to endanger the kingdom and after Godepert was overthrown by Grimoald duke of Beneventum (647-62), Perctarit sought refuge with the khagan of the Avars in Scythia, leaving behind his wife and son. Forced to leave when Grimoald threatened the khagan, he returned to Lodi
