12 Greek Coins ATTICA. Athens. Tetradrachm (Circa 137/6 BC). Herakleides, Eukles and Timar-, magistrates. Obv: Head of Athena Parthenos right, wearing triple crested Attic helmet decorated with Pegasus and floral pattern. Rev: A - ΘΕ / ΗΡΑ - ΚΛΕΙ / ΔΗΣ / ΕΥΚ / ΛΗΣ / ΤΙΜΑ / Ρ. Owl, with head facing, standing right on amphora. Controls: A on amphora, ΑΠ below; to right, winged Tyche standing left, holding amphora; all within wreath. Thompson 779B; HGC 4, 1602. Among the Greek poleis, Athens is undoubtedly the city that denotes the greatest monetary development. The earliest coinage followed the reforms attributed to Solon on the introduction of Attic weights to replace the Eginetic ones. These early coins, called "Wappenmünzen," were replaced by the "owls" at the end of the 6th century: tetradrachms marked with the head of Athena and the owl, next to which is now the ethnic of the Athenians. These types will last, with variations in style, until the end of silver production (c. mid-1st century). The most noticeable change occurs with the so-called "new style," established from the beginning of the 2nd century BC. In these issues the owl is surrounded by an olive wreath, which is why the tetradrachms are referred to in the inscriptions as "stephanephoroι" (= wreath bearers). Coins of new style also bear inscriptions with the names of magistrates

Club and bowcase; to upper left, owl standing right; kantharos to lower right. Condition : Good very fine. Erythrai was an ancient Greek city located in present-day western Turkey, near the modern town of Ildırı. It was founded around the 6th century BC and was an important port city in the region. The city was known for its sanctuary of Athena, which was considered one of the most important religious centers of the region. Erythrai was also known for its production of pottery, which was highly valued in the ancient world. The city had a significant role in the history of the region as it was conquered by the Persians in the 5th century BC, and later by Alexander the Great in the 4th century BC. During the Roman period, Erythrai continued to thrive as a center of trade and commerce. The city was an important hub for the transport of goods between the eastern Mediterranean and the Black Sea. Today, visitors can explore the ruins of Erythrai, which include the sanctuary of Athena, a well-preserved theater, and the city's ancient walls. The site offers a fascinating glimpse into the history and culture of ancient Greece. Weight: 3,6 gr Diameter:15,4 mm

67 Greek SATRAP OF CARIA. Hekatomnos, circa 392/1-377/6 BC. Obol (Silver), Milesian standard, Mylasa mint. Forepart of lion right, head turned left; above, E. Rev. Stellate pattern within incuse square. Konuk, Identities 9. HN Online 1706. SNG Kayhan 864-5. Very fine. Hekatomnos was the founder of a dynasty of which his son Maussollos is surely the best known today; nevertheless, Hekatomnos was surely the most successful since he expanded his borders to include Miletos and other cities in Asia. In fact, the types he used for this stater (and its fractions) are actually those of Miletos. Weight: 2,1 gr Diameter: 11,6 mm

Near EF, toned, slight porosity, light mark in field under tone on reverse. Exceptional for issue. The proposed attribution of this type to Evagoras II, originally made in the 19th century, is likely incorrect (cf. SNG Kayhan 1066 for a similar obol historically attributed to Evagoras). Interestingly, although Göktürk 88 retains the attribution to Evagoras II, Göktürk 52, another obol certainly related to this type, is placed at an uncertain mint in Cilicia. 190 Roman Republican Anonymous. 6th-4th centuries BC. Æ Aes Formatum . Irregular cast bronze in the shape of an astragalos. ICC p. 76, 6. The game of knucklebones was played with three or four small animal bones that have a distinctive shape on each of their four sides. Special significance was ascribed to the particular combination of sides showing with each toss. One pursuit was associated with the goddess Aphrodite, where the highest throw (four corresponding sides) was called "Aphrodite." Archaeological evidence suggests that knucklebones were often thrown by the devotees of the Cnidian Aphrodite to determine if they would enjoy the goddess' favor. Weight: 49 gr Diameter:29,5 mm

416 Byzantine Nicephorus Basilacius. Usurper . Follis; Nicephorus Basilacius. Usurper ; Thessalonica, May-July 1078 AD, Follis . Incorrectly as Anonymous Class N in both Sear-1903A and DO III, pp. 705-6. Obv: +ΝΙΚΦΟΡΟC ΒΑCΙΑ Νιμβάτε bust of Christ, raising r. hand and holding book in l. hand, IC - XC across field. Rx: IC - XC / ΝΙ - ΚΑ (Jesus Christ will conquer), Patriarchal cross on base. Bland's confirmation of the follis being minted by Nicephorus Basilacius, in 1992, is the accepted attribution due to obverse visible legend containing part of this usurper's name, BAC. After much research by many scholars, and because this coin has a relatively complete reverse, it has been determined that this is the Usurper Nicephorus Basilacius. (tetarteron). VF The various monetiform bronze tokens are
ascribed to the period following the introduction of the reduced
weight gold tetarteron by Nicephorus II (963-969). Hendy has
proposed the duo tetartwn as a weight for an issue of light weight
coins from the reign of Basil II. However, the evidence for this
"light weight coin" is debateable at best, and in any case the
weights of the duo tetartwn and the tetarteron pieces are
virtually identical, with well preserved specimens of both types
averaging about 3.97 grams. If these pieces are not weights, they
may be tesserae for the distribution of official donations. Weight:

479 ITALY, Venezia (Venice). Coinage struck during the Siege of Cyprus. CU Bisante ossidionale . Dated 1570. Lion of S. Marco reclining left, holding Gospel in paws / [V]ENETOR[V]/ FIDES INV/IOLABILIS/ BISANTE/ I in five lines. Paolucci 907 (R). VF. Rare and historically interesting. In July of 1570 the Turkish forces of Sultan Selim II invaded Cyprus. Nicosia quickly surrendered but Famagusta, against all odds, managed to fend off the Ottoman army for nearly a year. Such copper "bezants" were struck by the Venetian commander Marc'Antonio Bragadin as payment for his troops, with the expectation that these coins would be exchanged for proper gold bezants in the event of a favorable end to the conflict. The Venetian forces were hopelessly outnumbered, however, and were forced to surrender in August 1571. According to the terms of the surrender, Bragadin was guaranteed safe passage off the island, but the Ottoman general Lala Mustafa Pasha reneged. Bragadin was imprisoned and, shortly thereafter, flayed alive. His skin, stuffed with straw, was sent to the Sultan as a trophy. Weight: 5,4 gr Diameter:26,4 mm
