**24** LUCANIA. Sybaris. Nomos - Stater (Circa 550-510 BC). Obv: Bull standing left, head right; V M in exergue. Rev: Incuse bull standing right, head left. HN Italy 1729; SNG ANS 828-44; HGC 1, 1231. The Greek colonial presence on the coasts of southern Italy and in Sicily generated very important cities and significant coin productions, initially characterized by the "incuse coin phenomenon," which featured reverse types equal to obverse types, but in negative instead of relief. This was not simply an embossed worked foil, but an actual minting process, which involved the use of a reverse die with types rendered in relief. Various hypotheses have been advanced over time regarding this choice; there was probably a desire on the part of the Magna Graecia cities to differentiate these coins from those produced by the other Greek mints. Moreover, it could have been an expedient that made overstruck difficult, thus avoiding one of the possible causes of coin migration to places far from the issuing centers. This coin type was clearly intended for a local Magna Graecia market, as the hoards data show. Hence the existence of a circulation area controlled by the Magnogrean cities is assumed. The coinage of Sybaris is based on the "Achaean-Corinthian" weight system, with a stater of 7.80-8g, divided into three drachms, also used by Tarentum and other colonies of Achaean origin, such as Metapontion, Kroton and Kaulonia. The destruction of the city by Croton in 510 is a very important chronological term. Sybaris must have begun minting incuse coinage around 530 and may have been the first to introduce this type of coinage. The emblem chosen by the city is the bull with head reverted, found in an abundance of issues with different fractions (Drachms, Triobols and Obols). Condition: Good very fine. Weight: 7.69 g. Diameter: 30 mm.

**27** SICILY. Entella. Punic issues (Circa 300-289 BC). Tetrachdrachm. Obv: Head of Herakles right, wearing lion skin. Rev: Head of horse left; palm tree to right; Punic legend below. Jenkins 310 (O98/R257); HGC 2, 293. The foundation of Entella is traced back to Acestes, son of the river god Krimisos and a Trojan woman or, according to other sources to Prince Elymus, son of Anchises and brother of Aeneas. The city stood on a summit overlooking the Belice valley. Records are scarce until the arrival of the Campanian mercenaries, recruited in 410 BC by the Carthaginians and discharged after the 405 BC treaty, then passed into the pay of Dionysius I of Syracuse. After liberating Dionysius on the island of Ortigia from the Punic siege, the were discharged with rich gifts and settled in various cities on the island. In 404 a group of these mercenaries seized Entella, exterminating the entire male population, and began to mint their own coinage. From then on they implemented a generally pro-Carthaginian policy and, in 398 B.C., were able to stop Syracusan siege attempts with the help of the Punic. The strategic location of the fortress of Entella was coveted for its control of the valley below, and this led to several siege attempts: in 345 it was attacked by the Carthaginians led by General Annon, then in 342 the city was taken by the Syracusans commanded by Timoleon, but in 338 it fell back under Punic influence. During the First Punic War the city was destroyed by the Carthaginians. The "Decrees of Entella," which were requests for help engraved on bronze slabs, from the inhabitants to neighboring cities, date from this period. In 263 Entella was conquered by the Romans and enjoyed a new period of prosperity until the second century BC when it was abandoned. Condition: Very fine. Weight: 16.76 g. Diameter: 23 mm.

Le Rider 12; HGC 3.1, 844. In the Classical period throughout Greece silver coinage predominated, while gold was minted by a few cities. In Asia Minor electrum coins were still struck in three mints (Kyzikos, Mytilene and Phokaia) until the Athenian hegemony that followed the victory over the Persians. In 405 BC the issue of Lampsakos gold staters based on the Persian weight system began. Athens produced the first and only precious metal issues toward the end of the Peloponnesian War, in 407-6 BC, at a time of severe crisis when silver mining in Laurion began to fail and it was forced to melt down the Parthenon's gold statues. Aside from these cases, the first important and massive gold coinage in the Greek context was that of Philip II of Macedon. He minted abundant series of coins in several mints. Having conquered the city of Krenides, where the Thasians had already exploited gold mines, Philip renamed the city Philippi and started the production of philippéioi, gold staters weighing two Attic drachms. Apollo's youthful head appears on the obverse, a galloping chariot on the reverse, types glorifying the Macedonian ruler who had triumphed at the Olympian Games in 356 BC. The series also includes fractions. Condition: Fine. Weight: 8.53 g. Diameter: 17 mm.

Rev: ΑΛΕΞΑΝΔΡΟΥ. Nike standing left, holding wreath and stylis. Control: Kanthalos in left field. Price 168. Already with Philip II the occupation of the Mount Pangaion region with its rich gold mines had made possible the abundant emission of gold coins, something that until then had been throughout Greece rather rare and linked to extraordinary circumstances or moments of crisis. Alexander, who imposed a single coinage throughout his vast empire, was able to issue States and their fractions in gold, using the Attic weight as the unit of measure. On the Staters the head of the goddess Athena with Corinthian helmet was depicted on the obverse, while a winged Nike was reproduced on the reverse. On silver tetradrachms, on the other hand, the head of Herakles with lion skin was depicted on the obverse and Zeus seated on a throne on the reverse (Phidian model). Toward the end of his reign there is an assimilation of the ruler with Herakles. The practice, derived from the Eastern world of reproducing the portrait of the ruler on the coin, represents a change with Alexander's coinage. But as if the human figure did not dare to suddenly replace that of the gods, the image is clothed with religious content, through its deification or identification with the deity. Even after his death for a long time Tetradrachms with the effigy of Alexander continued to be issued by his successors. The Macedonian king had the possibility to exploit for his coinage a large amount of precious metal from the vast empire he had conquered. The extremely rich mines scattered throughout this territory also made his successors self-sufficient.. The coin from that time became a symbol of the ruler's power and absolute authority; no longer protected by the image of deities, it became an instrument of propaganda and power. Condition: Uncirculated. Weight: 8.63 g. Diameter: 17 mm.

Phoenix, crowned with nimbus, standing right. RPC IV.4 610; Dattari (Savio) 2431; Emmett 1419.6. In ancient times, people measured time using two main methods: observing the sun or the moon. The Egyptians were an exception because they used both methods at the same time, creating a civil calendar and a religious one. The civil calendar was based on Sothis, which moves parallel to the sun and, with its sunrise, marked the beginning of the annual flooding of the Nile. The entire civil year revolved around the river and its fertility. In fact, farmers divided the year into three seasons: flooding, sowing, and harvesting. The religious year, on the other hand, was based on the lunar calendar. Each month was dedicated to a different divinity who was celebrated during that period. However, the two calendars had different lengths, being based on different calculations, and coincided again after 1460 years, on July 19, AD 139, when the star Sothis aligned perfectly with the Sun on the horizon. This phenomenon marked the end of an era and the beginning of a new cycle during the reign of Antoninus Pius, and was celebrated with the special issue of a series of coins centered on the Zodiac. All the signs of the zodiac were represented on these coins, but they began with the Phoenix, as it was believed that the exceptional, millennial alignment of Sothis with the Sun also corresponded to the mythical rebirth of this sacred animal, symbol of eternal regeneration. Two soldiers, facing each other, each carrying off a Sabine woman in his arms. Crawford 344/1a; RBW -. The episode of the Rape of the Sabine Women is recounted by Livy and Plutarch. According to legend, among the many problems faced by the Romans was a shortage of women. Therefore, in order to ensure the future of the Roman race, various alliances were formed with the aim of finding a way to bring women from neighboring populations to Rome. One of the populations involved was that of the Sabines, who rejected the Roman proposal. Romulus and his companions then took advantage of the games in honor of the god Consus to invite the Sabines and kidnap the women, thus starting the war. But faced with the fact that their Sabine relatives and those who had meanwhile become their Roman husbands could be killed in battle, the women began to beg for an end to the massacre. As a result, what became known as the Rape of the Sabine Women led to a situation of peace and prosperity for the two peoples. Condition: Very fine. Weight: 3.93 g. Diameter: 19 mm.

This issue is among the first to bear witness to Tiberius' adoption and Augustus' decision to name him as his heir. The issue of succession was crucial for Augustus in order to consolidate his legacy. Having had no children with Livia Drusilla, he initially adopted his nephews Gaius and Lucius, sons of Marcus Vipsanius Agrippa and Julia, presenting them to the people as his designated heirs and conferring upon them extraordinary titles and powers for their young age. However, the premature death of his two grandsons (between 2 and 4 AD) and of Agrippa forced Augustus to revise his plans, and so he adopted Tiberius, the son of Livia and her previous husband, Tiberius Claudius Nero. This denarius, struck during Augustus' seventh tribunicia potestas, commemorates the renovation of the Via Flaminia (27 BC), a road that ran from the Porta Fontinalis gate in the Servian Wall to Aquileia. For the occasion, a series of silver and gold coins were issued to celebrate the event, highlighting the fact that Augustus had paid for the renovation out of his own pocket. On the reverse, the cippus bears the inscription "S(enatus) P(opulusque) R(omanum), Imp(eratori) Caes(ari), quod v(iae) m(unitae) s(unt) ex ea p(ecunia) q(uam) is ad a(erarium) d(etulit)" (= by decision of the Senate and the Roman people, to the Emperor and Caesar, for having reinforced the roads with funds he paid to the public treasury) and refers to Augustus' donation to the treasury of the sum of money necessary for the renovation of the Via Flaminia, as narrated by Cassius Dio and the emperor himself in the 'Res Gestae'. The memorial stone probably really existed and was erected in Rome to celebrate the event. The magistrate Vinicius was a family friend, known for having had an affair with Augustus' adulterous daughter, Julia. Condition: Very fine. Weight: 3.69 g. Diameter: 19 mm.

Venus standing right, back facing, leaning upon column to left, holding helmet and sceptre. RIC<sup>2</sup> 388 (Titus). Flavia Julia Augusta, known as Iulia Titi, was the only daughter of Emperor Titus and his second wife Marcia Furnilla. Very little is known about her, except that when she was still a child she was presented as the future successor of the Flavian dynasty, since her father, after his second divorce, had not taken another wife and the other women of the family (Domitilla Major and Domitilla Minor) had already died. When Titus came to power, Julia was given the title of Augusta, which was usually attributed to the emperor's wife. Titus proposed to his brother Domitian to marry Julia, but Domitian refused because he was in love with Domitia Longina. Julia therefore married her cousin, Titus Flavius Sabinus. Upon the death of his father (AD 81), Domitian became emperor and, after repudiating Domitia on suspicion of adultery, it seems that he began a relationship with Julia and had Sabinus killed. Julia died in abortion in 90, precluding her from providing an heir to the emperor. Condition: Near very fine. Weight: 3.16 g. Diameter: 20 mm.

Rare With the famous Battle of Mursa in 351 Constantius II inflicted a severe defeat on Magnentius, who two years later killed himself along with his brother Decentius, caesar of the West. This marked the beginning of a united kingdom for the winner, who at that point needed a caesar with a view to dynastic succession. Constantius appointed his cousin Constantius Gallus, who married Constantina, sister of the emperor and widow of Hannibalianus. Constantius Gallus was an able general who had brought down several Persian revolts. He had made himself hated not so much for his despotic ways as for his pro-poor monetary policy, in contrast to that initiated by Constantine and continued by Constantius II in favor of gold coinage and the wealthier classes. This led to his eventual assassination by a conspiracy of the Antioch aristocracy and his 'damnatio memoriae'. In his place in 355 Constantius II appointed Julian, who was destined to become emperor with the appellation "Apostate". Condition: Extremely fine. Weight: 3.28 g. Diameter: 21 mm.

**625 JULIAN II APOSTATA** (Caesar, 355-360). Siliqua. Arelate.  
Obv: D N IVLIANVS NOB CAES. Bareheaded, draped and cuirassed bust right. Rev: VOTIS / V / MVLTIS / X / TCON. Legend in four lines within wreath. RIC 264. Julian II was born in Constantinople, son of Basilina and Julius Constantius, half-brother of Constantine I 'the Great'. Because of his young age he was spared in the 337 massacre of Constantine's family members. His youthful education at the court of Constantius II was in the care of the pagan eunuch Mardonius, marked by the myth of classical culture and paganism, particularly Neoplatonism. Upon the death of Constantius Gallus, Julian took his place as Caesar in 355 and married Constantius II's sister, Helena, after which he immediately left to fight the Germans who had invaded Colonia Agrippinensium. Here, after a series of fights, he succeeded in winning the favor of the people and the army, who acclaimed him Augustus in 360, raising the ire of Constantius II. Upon the latter's death Julian became sole emperor and moved back to Constantinople, beginning to deprive the Christian Church of all the rights that had been granted to it by its predecessors, thus earning the appellation "Apostate." Although he never openly persecuted Christians, his policies undoubtedly favored pagans and Jews. Julian also distinguished himself as a man of culture, writing several works, both satirical and philosophical. His main goal was to get the Romans to return to worshiping the ancient gods, and he thought he would succeed by winning the war against the Persians of Shapur II. After a series of victories the emperor reached the gates of Ctesiphon in June 363, but at that point he hesitated and, instead of attacking the city, decided to wait until he rejoined Procopius' army. This move proved fatal, for after a hard fight at Maranga on the Tigris, he was wounded and killed at Samarra. Julian was buried at Tarsus, while peace was signed with Shapur II and Jovian, a moderate Christian, was elected new emperor. Condition: Extremely fine. Weight: 2.05 g. Diameter: 19 mm.

Artemius was an imperial secretary during the reign of Philippicus before overthrowing him in 713, ascending the throne as Anastasius II. He immediately took an oath of orthodoxy to move away from the religious views of his predecessor, of monothete faith, in order to realign with tradition. Foreign policy posed a greater danger, as the Arabs were expanding into Asia Minor in the absence of a solid Byzantine dynasty. Anastasius thus organised a great naval expedition to Rhodes, but an internal betrayal led to his defeat and the rebels appointed a new emperor, a tax collector named Theodosius. Anastasius then faced a civil war, which ended after six months when the rebels prevailed with the help of the Ostrogoths. The emperor was forced to become a monk, but continued to plot to regain his throne, trying to gain the help of the Bulgarian Khan. His attempt came to an end with his assassination in 720, during the reign of Leo III, Theodosius' successor. Condition: Very fine. Weight: 2.90 g. Diameter: 20 mm.
